CROSSFIELD CHRONICLE

VOL. XXIII. No. 28

CROSSFIELD, ALBERTA, JULY 31st., 1930

PRICE 1.50 A YEAR

The money people pay for things is not as important as the satisfaction they get from them.

The more one pays for an article, the more he thinks of that article.

If you buy a piece of equipment that offers a life-time of satisfactory service, the price is a small consideration.

If you haven't looked over our line of

## Monarch Ranges

do so now, and let us tell you about the easy way they can be bought.

The price may seem high, but value considered, they are the cheapest article in the store.

Wm. Laut

The Pioneer Merchant

Crossfield, Alta.

## Conservatives Have Majority Over All With 138 Seats

### New Premier-Elect of Canada

HON. R. B. BENNETT, K.C.

Leader of the Conservative party in Canada, whose supporters were swept into power in the federal elections Monday, and who won a great personal victory in West Calgary where he was returned with a majority of more than 8,000.

### The Park is Popular Place These Days

The park is going over big, being crowded with children every day since the opening.

We all regret we did not have Jim Banta with us last Wednesday. Jim is the man that donated the park in perpetuity to the Village. He now lives in the Medicine Hat district, but he can rest assured that the parents and children of Crossfield will be ever grateful to him for his bequest, and trust that at some later date he will be amongst us, and see realised his vision of a real playground and park for the kiddies of Crossfield and district.

### Main Street Has Been Greatly Improved

A few years ago Crossfield was scarcely more than a jumping-off place. Today it boasts of a live-wire Board of Trade, and an active Village Council. Until the Council tackled the matter recently the roads were in bad shape; but they have now taken the bull by the horns, and made a real good job of graveling the road on Main Street from the south crossing to the centre of the town. There were some bad holes to be filled up, and with the combined help of the various tradespeople, the Council has put the road in good shape, and next year it is planned to gravel the remainder of the street. Now, adays, traffic is very heavy, and the demands on the road very severe. Good roads mean good business; and good business in turn means a good town.

Some people fear that Crossfield is too near Calgary to grow; but if these people would only count up the money value of time saved by trading at home, as well as the wear and tear of car, tires, etc. they would soon build up a bigger and greater Crossfield.

### On Long Motor Trip

Mr. and Mrs. D. Bills and their daughter Mrs. J. R. Bollek, and Miss Ruth Bollek, of Van Nuys, Cal., and Mr. C. Bills of Orange, California, arrived here on Saturday, after a motor trip from California to Oklahoma, then to Detroit and on to Crossfield. Mr. and Mrs. D. Bills make an annual trip to Crossfield to visit their sons Evert and Orval.

From the Atlantic to the Pacific the Conservative policies have been accepted. Every province in the Dominion has shown by their votes that they have confidence in the Conservative party headed by Hon. R. B. Bennett.

### Bennett Has 138

In the election of 1926, Premier King found himself with 123 Liberal supporters, to which he could add nine Liberal-Progressives mostly from Manitoba, giving him a comfortable working majority in a house of 245 members. Today Hon. R. B. Bennett has a following of 138, with the possibility of picking up the one seat in doubt in Quebec. He need therefore look no further for support among the depleted Independent groups, and for the first time since the war a government goes into office with a clear ready-made majority.

### Results Over Dominion

Conservatives	138
Liberals	86
United Farmers	10
Progressives	2
Liberal-Progressives	3
Labor	3
Independents	2
Doubtful	1

### Dr. R. G. Stanley Elected With Large Majority

East Calgary Riding Gives Stanley, Conservative a Majority of 5,527

The returns from the whole riding gave Stanley, 11,700; Adhead, 6,173, thus giving Stanley a majority of 5,527; while the voting in the polls near Crossfield was as follows:

Poll	Stanley	Adhead
68. Elba	34	20
69. Meadowside	26	18
72. Tan y Bryn	13	39
73. Greenwood	22	18
74. Crossfield	142	101
77. Sampson	47	30
78. Banner	47	14

### Blackie Here on Sunday

Blackie, holders of the Calgary Brewery Trophy, and the best amateur baseball team in Southern Alberta will play a double header at the local diamond on Sunday, August 3rd at 3.30 and 5 p.m. This series will decide the amateur championship of Alberta.

### Floral U.F.W.A Had Interesting Meeting

The July meeting of the Floral U.F.W.A. held at the home of I. Thompson on the 22nd inst was well attended, twenty ladies being present. After the reading of the June minutes, roll call, etc., Mrs. Ian Laut read a very interesting paper on "Home Economics." Mrs. Thos. Fitzgerald read a paper on "Legislation," and also gave a report on the Federal Convention, East Calgary, held in Calgary on July 9th.

Miss Margaret Stewart, Floral U.F.W.A. delegate, to the Junior Conference, held in Edmonton in June, gave a well prepared and interesting report of that Conference.

The July meeting was much enjoyed by all, as was the dainty lunch served by the hostesses for the month, Mrs. O. E. Jones, Mrs. Scholfield, Mrs. O. Bills, and Mrs. W. Stafford.

Despite the fact that we had local showers in and around town every day last week, some parts of the district have not had rain for some time and a good general soaker would be welcomed.

Gardens are looking exceptionally well and we are assured of a good crop of potatoes this year.

## When a Laxative Gripes

### BEWARE!

Severe abdominal pains, griping, after taking a laxative is an indication of unnatural strain that may cause serious injury. No laxative that causes such discomfort is safe, or necessary. ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, night or morning, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

## ENO'S FRUIT SALT

## The World's Grain Exhibition

The World's Poultry Congress is now in progress at the Crystal Palace, London, England, including a representative display of birds from Canada and with prominent Canadians identified with the poultry industry in attendance. A year or two ago Canada was honored by being host to the World's Poultry Congress, held in Ottawa, and which proved to be the most successful of these world's congresses held up to that time. Canada received most valuable publicity as a result, while the poultry industry throughout the Dominion was decidedly benefited thereby.

Canada is again to be host to a world's exhibition and conference in 1932, when the World's Grain Exhibition and Conference will be held in the city of Regina, Saskatchewan. It will be the greatest grain exhibition and conference ever held, with over \$200,000 in cash prizes, an unprecedented sum, to be awarded, while grain exporters from all over the world will be in attendance to participate in the conference.

Already the response of countries in every hemisphere has surpassed expectations. To date nearly one million copies of the official prize list have been distributed in 84 countries. They have been placed where they will do the most good, and give a maximum of advertising to Canada, and Western Canada in particular, in every corner of the civilized world.

Canada as a country dependent on agriculture, and suffering all the growing pains of the young, needs this advertising, and even supposing no person from outside Canada attended the Exhibition and Conference at Regina, in 1932, the world-wide advertising already secured would be an ample return for all monies expended to date.

But the countries of the world will be represented, not only by interesting and instructive exhibits, but by leading agricultural experts. The Government of Canada officially issued invitations to other countries to participate and today—two years before the event—eight countries have accepted. These are Peru, New Zealand, Guatemala, Poland, Czechoslovakia, Yugoslavia, Belgium and the Netherlands. The Governments of other countries, such as the United States, Great Britain, France, the Argentine, Australia, have asked for further and more complete information, and by 1932 it is expected at least 50 countries will have accepted the invitation and be present.

The management of the World's Grain Exhibition and Conference has taken advantage of the World's Poultry Congress, in London, England, this year to further its campaign for world-wide participation at Regina in 1932, and has sent an exhibit to London, and this week are entertaining in London, the official delegates of 56 countries. At this luncheon the managing director of the World's Grain Exhibition will address these delegates and outline to them why they should participate at Regina. Afterwards he will visit the ministries of agriculture, of the countries of Europe, to drive that message home.

Exhibits of the World's Grain Exhibition are also being prepared for the Canadian National Exhibition, and the Royal Winter Fair, at Toronto, and the International Grain Show at Chicago.

This is what is being done to bring the world to Western Canada in 1932. But, and this is important, Western Canada should put forth every effort to retain for this country the world's championship wheat trophy. Other countries are going to try and capture it; we are asking, even urging them, to make it attempt. Western Canada must therefore look to its laurels. The wheat farmers of Western Canada—the best in the world—must be alert and put forth their best efforts, individually and collectively, to retain for this Dominion the proud title of the World's Wheat King.

Now is the time to prepare for the exhibition. It cannot be put off until 1932. It must be done in 1930 and 1931.

### To Cope With Cancer

War-Time Mustard Gas Now Used For This Purpose

Use of war-time mustard gas in combating cancer is described in the annual report of the grand council of the British Empire cancer campaign.

The report said, "Mustard gas seems to be the first true anti-carcinogenic agent ever discovered." Action of the gases was explained as being localized to the particular area under treatment and its cure to be strictly limited in time. But none the less on that account a remarkable cure."

### Baker Lake

According to the records of the Geographic Board of Canada, Baker Lake was so called in 1762 by Capt. Christopher of the ship "Churchill," who discovered the lake on ascending Chesterfield inlet from Hudson Bay in that year.

### Usual Order Reversed

Cleveland Children Look On While Parents Graduate

The usual order of school commencements was reversed at Cleveland when an audience of children sat in the auditorium of John Hay High School and applauded their parents as they marched to the platform to receive high school diplomas. The occasion was the annual commencement of the Cleveland Extension High School.

Ages of graduates ranged from 17 to well past middle age. In the class was a golf professional, an assistant sales manager, a chief auditor, a credit manager, an assistant treasurer and a field manager for a large oil company.

Have Minard's Liniment on your shelf.

World Depression In Wool Prices New Zealand, like Australia, has been hit a severe blow by the wool depression in wool prices. It was revealed recently. The gross receipt of the New Zealand wool sales this year were about \$35,000,000 below last year's yield. Wool forms by far the largest part of New Zealand's exports, the value of the wool export in 1928 being more than \$80,000,000.

A beam of light travels so fast that it could make a round trip from New York to San Francisco in approximately a seventy-fifth of a second.

China plans to spend \$4,000,000 in improving its government telegraph lines.

## Archbishop Opposed To Death Penalty

### Says It Lowers Conception Of Sanctity Of Life

The Most Rev. William Temple, Archbishop of York, is one of the few witnesses who has come so far before the Royal Commission on punishments to favor the abolition of the death penalty.

"It is dissent from the view that punishment should be regarded as regulated vengeance," the Archbishop stated. "From a Christian viewpoint, vengeance is entirely illegitimate. The infliction of death or outlawry would, perhaps, be justifiable in the case of a man who was wholly evil but no person was ever that."

The main argument advanced by the archbishop from a sociological viewpoint was that the behaviour of a community as a whole was so largely imitative that the reaction to the taking of life by the state tended to a lower general conception of the sanctity of human life.

## Summer Complaints Kill Little Ones

At the first sign of illness during the hot weather give the little one Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaint, if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. They are sold by all druggists or by mail at 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

### May Purchase Canadian Land

Another English Peer Interested In Farming In Dominion

The possibilities of southern Saskatchewan for ranching on a large scale were investigated recently by Lord Middleton, Yorkshire landowner, who is touring Canada with a view to purchasing land in this country. Lord Middleton specializes in breeding best cattle on his 3,000-acre farm in the north of England. He recently made the decision to dispose of the whole of his estates, comprising some thousands of acres, driven to this step by the excessive burden of taxation to which every British landowner has been subjected since the war. It is his plan to take up land in Canada. He was an interested visitor at the Brandon Summer Fair, and in all the departments he visited, those in charge were rather amazed at the knowledge he had of farm affairs and of horticulture. He brought over to Ontario some fifty Yorkshire lads, who will be placed on Ontario farms.

Toothache and neuralgia are instantly relieved with Douglas' Egyptian Liniment. A quick sure remedy. Also recommended for burns, sprains, sores and inflammation.

### Father Of Many Inventions

Sir Charles Wheatstone Gave Many Scientific Ideas To World

The concertina celebrated its centenary by Charles—afterward Sir tenary last year. It was invented and Charles—Wheatstone, in 1829. He must have been a wonderful man, for his inventions seem to have been legion. Sir Charles invented, for example, the stereoscope, by which the appearance of solidity is obtained through the mental combination of two pictures and the polar clock, which made it possible to tell the time by the light from the sky although the sun might be invisible. It was he who made the electric telegraph available for the public transmission of messages. And in between his scientific studies he sandwiched the invention of our little musical friend the concertina.

Wax figures for store windows in London are being made to represent Helen Wills, Princess Elizabeth, Prime Minister MacDonald and other well-known people.

Illuminated cap badges are used by the messenger boys of a wireless telegraph company in London.

### Thinning Hair

Stimulate your scalp and prevent dandruff by massaging with Minard's. It gives hair new lustre.

**MINARD'S LINIMENT**

THE KING OF PAIN

### PRINCE AND PRASANT

Signorina Maria Rizzatti, Roman laundry girl, who has just married Prince Danton, member of one of the oldest and wealthiest Italian families. The Prince called at the laundry to commend them upon the ironing of his shirts when he met his future bride.

### To Patrol the Straits

Government Ice-Breaker Is Leaving For Northern Waters

The new government ice-breaker, the "N. B. MacLean," is to take her maiden plunge into Arctic waters early in August. The ship, which was launched at Halifax a few months ago, is named after Major MacLean, the government's chief authority on ice and ice-breakers, who commanded the Hudson's Straits expedition two years ago.

The ship will take up supplies to four directional wireless stations, established by the ministry of marine on Hudson Bay and manned by wireless operators of the radio branch. These stations are located at Cape Hope's Advance, Resolution Island, Nottingham Island and Fort Churchill.

The ice-breaker will patrol the straits all through the fall months and when the northern ice begins to close down will protect the shipping in Hudson's Bay and through the straits.

### Pleases Britain

Franco-Italian Naval Conventions Will Help London Naval Treaty

Prime Minister MacDonald told the British House of Commons recently, that the British Government had learned with pleasure of arrangements made by the governments of France and Italy with a view of facilitating resumption of discussions on naval questions.

Mr. MacDonald said the British government hoped these Franco-Italian conversations would complete the work of the London Naval Conference and that the principle of naval limitation, as contained in part Three of the London Naval Treaty, would be applied to all parties to the conference.

It said it was not necessary for the British Government to take any action in this connection regarding the British naval program of 1930 since this was purely for necessary replacements within the reduced tonnage limits imposed by the treaty.

Persian Balm — there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing — it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

### Centenary Of The Match

France preparing to celebrate in 1931 the centenary of the phosphorus match. It was 99 years ago that a young student, Charles Saurel, of Dole, dipped slivers of wood into liquid phosphorus and was able to light the match by striking it on a file.

Freshman: "What would you do if the girl you were calling on raved and shrieked that she never wanted to see you again?"

His Buddy: "I'd jump to my feet and leave."

"And let her fall to the floor?"

An exceptional coconut tree may produce as many as 500 nuts in a year.

### Railplane Has Been Tested

Torpedo-Shaped Coach Is Driven By Two Propellers

The world's first experimental railplane system, backed by the London and Northeastern Railway, has been inaugurated at Milngavie, Scotland.

A torpedo-shaped coach driven by two aeroplane propellers, operating fore and aft, and drawing electrical power from the overhead rail to which it is suspended, flashed over an experimental stretch of track built above the main right-of-way of the London and Northeastern Railway.

It carried 25 passengers and is capable of developing a speed of 150 miles an hour on a long stretch of track, according to its designer, George Bennis, a Scottish engineer.

The railplane is England's answer to the demand of the aeroplane age for speedier transportation. The new system was inspected by delegates to the Transport Congress, which met in Glasgow. If it wins their approval, plans for a railplane system between Blackpool and Southport, a distance of 25 miles, will be carried out.

A railplane system can be built at one-third the cost of a double track railway system, say the London and Northeastern experts.

Each railplane coach will be self-propelled and will run alone. The overhead rail will direct the course and guide rails will keep it from swinging. The car is stopped by reversing the propellers, which then act as brakes.

The aerial railway can be erected over roads, canals or in the present instance, over railroads, without interfering with the ground traffic. Thus, in the case of railroads, a ground line could be used for freight, while the air line could be used for speedy passenger service and the carrying of mails.

### Show Decided Increase

Progress Reported For Creameries All Over Alberta

Alberta creameries during the first four months of the year have shown an increase of 4.4 per cent. over the similar period of 1929, and 35 per cent. above the same period of 1928. Creameries in the south of the province showed an increase of 1 per cent., those in the central part a similar increase, and those in the northern zone a 19 per cent. increase.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

### Nanking Is Ambitious

Has Extensive Plan To Reconstruct City In Big Way

Nanking, China, proposes to reconstruct the city in a big way. Already 77 proposals of improvements have been adopted. Among them are the construction of a river port, installation of a waterworks system, opening of a metropolitan park and a Grand Metropolitan Museum, provision for three clinics, promotion of industry and the opening of factories, development of arboriculture, and laying out of a beautiful residential district.

## HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

### Artificial Wool

Artificial Sheep Will Grow Wool Indefinitely, Say Scientists

That artificial sheep will grow real wool indefinitely is the prediction of the British Research Association for the Woolen and Worsted Industry following recent experiments in the hair growth of animals. By merely slicing off pieces of live sheepskin and placing them in vats containing a certain chemical solution, the pieces may be continuously nourished and thus produce hair year in and year out. Cowhide also might be treated in the same way, say the association's chemists.

### Morning Eggs Weigh More

Tests Show Them Heavier Than Those Laid In Afternoon

Tests conducted on different chicken farms by C. Howard King, poultry supervisor of the Wisconsin Department of Agriculture and Markets, revealed that eggs laid in the forenoon weigh 24.16 ounces a dozen while those laid in the afternoon averaged only 23.59 ounces, according to a report from Madison, Wisconsin. This suggests another problem for commercial egg producers—how to make hens lay in the forenoon—and bigger eggs.

Minard's Liniment for Lumbago and Neuralgia.

### Game In Canada

The physical characteristics of Canada's innumerable lakes, extensive forests, and great open prairies—combine with its natural geographical situation to constitute a distinct faunal region within which is to be found almost every species of game native to the North American continent.

## Canada Has Maintained Lead In Silver Fox Ranching Industry, Which Is Steadily Growing

Canada was the first to develop the breeding of silver foxes and she has so maintained her position in this respect that she is regarded as a world-leader by all other countries, whose representatives periodically visit the Dominion in search of knowledge and advice in the conduct of similar undertakings. While silver fox ranching has been exploited here and there by individuals who have been stressing its financial possibilities, yet the industry as a whole has developed along sound and economic lines, due in the first place to the foresight of the pioneers and to the vigilant conservative methods of the fox breeders of Prince Edward Island who nursed the silver fox industry through its infancy.

The Canadian National Silver Fox Breeders' Association is the largest breeders' society in the Dominion and registers annually a larger number of pedigreed animals than is to be found in any other species of live stock. The 70,883 silver fox pups born in 1929, and registered by this association, are descended from less than a score of silver foxes taken from the wild by the pioneer breeders. The remarkable growth of the silver fox industry is indicated by the figures of the last four years taken from Canadian Live Stock records, of silver fox pups registered by the above association: 1926, 32,355; 1927, 39,767; 1928, 51,624; 1929, 70,883.

While Prince Edward Island is still the cradle and the home of the industry, silver fox ranching is being firmly established in practically every province of the Dominion, and is operating on a very large scale, more particularly in the province of Quebec. Silver fox ranching has also become established in a great number of European countries, and heavy shipments of live foxes are made annually from Canada, 2,558 having been exported from Prince Edward Island alone in 1929.

While there has been a larger sale of live silver foxes as breeding stock during the last few years than ever before, yet these animals represent only about 25 per cent. of the silver foxes produced. The main function of silver fox ranching is the production of pelts. In fact, large numbers of the ranches are no longer interested in the sale of live foxes. As a consequence, there has been a rapid increase in the number of silver fox pelts coming into the market, and as the number has increased, a wider and more general interest has been shown in silver fox furs by the fur buyers and by the fur trade as a whole. This has resulted, generally speaking, in a steady increase in the prices obtained for silver fox furs. Of course, as was to be expected, the financial stringency of last autumn had a marked effect on the prices of all pelts at the December and January fur sales, but silver fox furs were less affected than any other class.

During the last two decades of the 19th century before foxes were raised in captivity, it has been estimated that between 2,000 and 3,000 silver fox pelts were placed upon the market annually. For the past two years over 100,000 of this number have been absorbed each year by the fur trade, and as the number of captured wild animals has not increased, it is estimated that wild pelts comprise only about 2,000 of this number. This estimate is confirmed by the fact that at the different fur auctions pelts of wild foxes formed less than two per cent. of the total offerings.

**New School For Indian Reserve**  
It is officially reported that \$60,000 is to be spent on improvements to buildings in the Indian Reserve at Gleichen this summer. The finishing touches are now being put on the new school recently built on the Reserve at Gleichen.

**They say: Time is money! If I had as much money as I have time, I'd be a millionaire.**—Hummer, Hamburg.

**W. N. U. 1929**

### Heavy Livestock Losses

**Cattle and Pigs Die From Bite Of Black Fly**

From eastern Saskatchewan have come reports of considerable damage to cattle and hogs from the attacks of a small fly. A species of tiny black fly, known as Simulium, is causing heavy livestock losses on farms near Saskatchewan River, where the flies breed. In the Pike Lake district, at least seven head of cattle and three pigs have died from the effects of the flies' bites.

Eggs of the flies are laid on exposed stones near running water. When the river rises and the water washes over the stones the friction causes the eggs to hatch.

When the flies are thick, animals should be housed, the University of Saskatchewan veterinary department advises, and bathing soda and water should be used to reduce swelling and lessen pain.

### Favourite Canadian Apples

**McIntosh, Spy, Gravenstein, Delicious and Baldwin Are the Favourites**

Canada has a wide range of apple varieties and the question as to which of these is the most popular provides a good deal of interest. In a survey conducted by the Fruit Branch of the Dominion Department of Agriculture, the McIntosh was shown to have a marked preference in Canada generally. Next came the Spy, then the Gravenstein, then Delicious, and then the Baldwin.

(By Annabelle Worthington)

**Enhance your charm by wearing flattering jacket costumes.**  
It is a season of jackets!  
The one sketched in is green crepe silk print in combination with egg-shell.

The skirt shows slenderizing line in pointed hip yoke treatment. The jacket is in popular hip length.  
Style No. 3438 comes in sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30 inches bust.

It is stunning with the dress made of chiffon print in hyacinth blue colouring, with the jacket of flat silk crepe in matching shade.  
Yellow and white sportswear lines with plain yellow and white lines for simulated tuck-in bodice is very chic.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

### Branding Without Harm To The Hide

"The Western Producer," of Winnipeg, in publishing the illustration reproduced here says: "Canadian (Western) hides have a rather bad name amongst tanners, due to the fact that so many of them carry large brands on the most desirable part of the hide. Front quarter brands are least likely to spoil a hide."

### Grain By Bay Route

**Seventy-One Years Ago Grain Was Imported From Britain Into Hudson Bay**

Workers are toiling today on the steel and concrete framework of the grain elevator at Churchill, to aid in the movement of the 1931 wheat crop over the Hudson Bay route. But 71 years ago the Bay route was used for the shipment of wheat—at that time to the prairies which now supply consumers in all parts of the world.

In 1859 some eleven thousand bushels of wheat and seven thousand bushels of flour were imported for prairie settlers. The bulk of these supplies came to Red River (now Winnipeg), in the round-bottomed sailing vessels which braved the dangers of the northern route. Seventeen years later Manitoba shipped out its first wheat down the river to Duluth, Minnesota, and thence by rail to Toronto.

In the interim the western prairies have swelled their grain producing expanses until half-billion bushel crops have become an actuality. And advancing trade is preparing to move out over a bay route used by grandfathers of folk who toil today.

### Study Sheep Industry

**Will Make Economic Survey Of Sheep Raising In The West**

Dr. J. H. Grisdale has announced an economic survey of the sheep raising industry in Saskatchewan, Alberta and British Columbia this summer. The Agricultural Economics Branch and the Experimental Farms Branch of the Dominion Department of Agriculture, will co-operate in carrying out the survey. This survey, which will include a complete study of conditions in the sheep ranching industry, marks the beginning of a program of research work in agricultural economics on behalf of the Livestock Industry. It is anticipated that between 150 and 200 sheep ranchers will be visited in the three provinces. Departmental experts will be assisted by representatives of the respective Provincial governments and of Livestock Associations in carrying out work of the survey.

Wife: There's one thing about my mother; she's outspoken.  
Huband: Not by anyone I know.

### Empire Games at Hamilton

Hamilton, Ontario, will be the centre next month of the British Empire Games to which athletes from all the Dominions and the Mother Country will flock. E. W. Beatty, chairman and president, Canadian Pacific Railway, is chairman of the national committee of the A.A.U. of Canada for the Games, and promises of support have been received by the committee from Australia, New Zealand, Africa, Irish, Crown Colonies, the Irish Free State, Northern Ireland, while a strong and representative British committee has been formed to ensure full British participation at this notable sports gathering of the British peoples. Canada will, of course, be very fully represented, practically every province sending its outstanding athletes. The Games are scheduled to be held August 16-23.

## Pale Western Cutworm One Of Worst Pests With Which Farmers Have To Contend

### Will Exhibit At Big Show

**Belgium To Take Part In World's Grain Exhibition**

According to word received at the headquarters office at Regina, Belgium has officially accepted the invitation to take part in the World's Grain Exhibition and Conference, to be held at Regina from July 25 to August 6, 1932.

Belgium of course became very well known for the part it played during the Great War. It may be interesting, however, to note that Belgium and The Netherlands are two of the smallest but most densely populated states in Europe. In area they are together not so large as the province of New Brunswick and are but one-tenth the size of Manitoba. The population of each is, however, about equal to the whole of Canada. Belgium also governs the Belgian Congo in Central Africa.

Because of the density of the population in these small countries it becomes necessary to make the very best use of every resource the people possess. Over in Canada, where if their farmers farmed as we farm it would be impossible for so many of them to exist in such a small land, but by their thorough methods of cultivating the land, and their industry, care and thrift, the Belgians have become a very prosperous people. According to "The Statesman's Year Book, 1930," Belgium, in 1928, produced 9,790,800 cwt. of wheat from 480,232 acres, 1,900,148 cwt. of barley from 76,172 acres; 14,063,478 cwt. of rye from 579,085 acres. In addition to these field crops, the farmers produce immense quantities of sugar beets, potatoes, flowering bulbs and dairy products. With such a record the great value of Belgium's contribution to the exhibition and conference of 1932 is assured.

### Fish Industry

**Canada Ships Fish To Almost Every Part Of The World**  
There aren't very many corners of the world where Canadian fish is not found. Canada's fish is sold. Last year Canadian fish and fish products found markets virtually all over the world and accounted for nearly \$36,000,000 of the export totals. In 1929 nearly 91 million pounds of Canadian canned salmon were sold abroad, with the sales representing \$8,865,000 in value. Australia and New Zealand were purchasers to the amount of more than \$2,700,000. Sales to the United Kingdom had a value of \$1,780,000, in round figures, while purchases by France totalled \$1,709,000 and Italy took canned salmon to the value of \$738,000. About 25 or 30 countries were buyers.

Part of Plato's philosophy was to the effect that the mind was always superior to the body and should at all times control it.

Mrs. M. Polk, aged 73, of New York, recently made her ninety-second crossing of the Atlantic.

Mr. Thomas explained the agenda for the conference was a matter on which agreement must be reached between the governments taking part. He gave assurance the questions would not be dismissed without consideration. The questioner probably had in mind the suggestions that a board should be set up to regulate imports of grain.

Mr. Thomas explained the agenda for the conference was a matter on which agreement must be reached between the governments taking part. He gave assurance the questions would not be dismissed without consideration. The questioner probably had in mind the suggestions that a board should be set up to regulate imports of grain.

Mr. Thomas explained the agenda for the conference was a matter on which agreement must be reached between the governments taking part. He gave assurance the questions would not be dismissed without consideration. The questioner probably had in mind the suggestions that a board should be set up to regulate imports of grain.

**Shortage In Egg Production**  
Report Shows Extra Grade Is Becoming Quite Scarce  
The production of eggs is still declining all over Canada, states the weekly egg and poultry report of the Dominion Department of Agriculture. The market is generally inclined to be firmer, particularly extras, which grade is becoming quite scarce. While there has been no material advance in prices of eggs, as yet, there is a much stronger undertone. At some of the larger consuming centres in the east local receipts of eggs are not sufficient to meet the consumptive demand.

**New Grievance Against Autos**  
Farmers of Scotland have found a new grievance against the automobile. Entries to the fall fair this year are to be few because, they say, the increasing number of cars make it unsafe to drive their choice livestock along the highways leading to the events. Some sheep owners plan to buy machines to transport their exhibits.

**Mystery Bus Trips A Novelty**  
Dublin, Irish Free State, has just introduced auto-bus mystery trips as a novelty. Passengers are given a fifty-mile drive every evening during the summer for 60 cents. There is a stop of one hour at popular resorts. The route is not announced beforehand in order to arouse interest.

The pale western cutworm is one of the worst insect pests with which the farmers of Alberta and Saskatchewan have to contend. Its presence in a field in the spring depends entirely on the condition of that field during August and early September of the previous season. For this reason, this warning is issued so that farmers in these two provinces may prepare their fields this summer to avoid trouble next spring.

The weather conditions during the early season of 1930 have been such as to practically ensure an enormous increase of the pale western cutworm over a large area in both Alberta and Saskatchewan. In fact, it appears now as though these provinces would have the most widespread and devastating outbreak of this insect that has ever occurred.

The outbreak will be most severe in the Lethbridge-Medicine Hat line of the Canadian Pacific Railway, and east of the McLeod-Edmonton line. There will undoubtedly be some increase south of Lethbridge and Medicine Hat and farmers in that area will do well to handle their fields accordingly.

In Saskatchewan the outbreak will probably be quite general from Saskatoon south to the border. The most severe damage will probably occur in a 100 mile radius of Regina. The isolated locust outbreak which occurred in 1930 over the rest of Saskatchewan west of a north and south line through Indian Head and Atherly will probably increase in intensity and will undoubtedly be some increase so as to make a general outbreak with severe conditions scattered throughout it.

Wherever possible, farmers are urged to keep entirely off their fields from the first of August until the middle of September. Summerfallow should be well worked during July so that all weed growth is destroyed and then left untouched. No stock should be allowed to run on the land and no machinery taken across it.

The adult moths of the pale western cutworm lay their eggs during August and early September. The eggs are always laid in soft, dusty soil and any fields which have the soil surface slightly crusted will be largely avoided by the moths. In fact, a light rain is sufficient to form this protective crust and if the last cultivation is followed by such a rain the crust that is formed should not be broken in any way. Fields which are in crop that must be harvested during August will have the surface crust destroyed by these operations and the cutworms will be present there next spring. If the crop is cut such that it is left until the middle of September or can be cut and stacked before the first of August nothing should be allowed to disturb the soil crust between those dates.

The entire problem during a pale western cutworm outbreak can be simply expressed as follows:

1. Any fields in which the soil surface is crusted and undisturbed from the first of August to the middle of September will be reasonably free of cutworms the following spring.

2. Any fields in which the soil surface crust is broken or disturbed between the first of August and the middle of September, are reasonably sure to be infested with cutworms the following spring. If such fields are needed the crop will probably be destroyed.

The only hope of growing crops successfully over the outbreak area in 1931 if the foregoing recommendations are not followed depends entirely on the spring rainfall. Wet season during next May and June with frequent heavy rains may reduce the amount of damage. When the soil is wet the pale western cutworm does not feed as heavily or destroy as many plants as it does when the soil is dry.

More detailed information can be secured by writing to the Dominion entomological laboratory at Lethbridge, Alberta; Saskatoon, Saskatchewan; Indian Head, Saskatchewan, or Treesbank, Manitoba.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Rockefeller Foundation has decided to give \$400,000 to the University of Sydney, Australia, for medical research.

The Irish Free State, like Great Britain, gave the European union idea cool treatment in a note responding to Foreign Minister Briand's questionnaire.

British Columbia's lumber industry is holding its export markets better than Washington and Oregon, according to H. R. MacMillan, leading exporter.

The Canadian Bank of Commerce shipped \$1,600,000 in gold to Canada, from New York, the first important shipment of the yellow metal across the border since 1927.

Value of building permits issued in 61 Canadian cities during June was \$17,836,478, according to a report issued by the Dominion Bureau of Statistics.

"Pure invention," was how Sir Godfrey Thomas, private secretary to the Prince of Wales, described a story that the Prince plans a United States visit and Canadian "camping holiday" this year.

Seven thousand specimens of poultry from 23 countries, including Canada and the United States, went on exhibit in the Crystal Palace, London, England, for the World's Poultry Show.

To commemorate the action of the 700 Indians who decided to the British crown all land extending west to York, a cairn will be erected at Carrying Place, Prince Edward County, Ontario. A 25-foot plot at the main corner of the village has been chosen as the most suitable location.

The death occurred of James M. Coleman at his residence, 356 Oliver Avenue, Montreal. Mr. Coleman was a well-known figure in railway circles and was the inventor of the Coleman locking device, which prevents passenger cars from telescoping in a railway collision. He was in his 70th year.

Anxious To Capture  
Market In Canada

Australia Makes First Shipment of Oranges For Distribution

The first shipment of Australian oranges to enter Vancouver, 5,000 cases from Sydney, N.S.W., was unloaded recently for distribution at various points throughout the Dominion.

To capture the Canadian market for Australian orange growers is the aim of the wholesale fruit distributors organization of Sydney, which two months ago sent W. H. Pierce here to pave the way for the drive.

Claiming that the Australian fruit surpasses the best from the United States, the fruit growers of New South Wales believe that their product will quickly win a large share of the market that the United States producers now enjoy.

## Banded Bird Law

Co-Operation With Proper Authorities Is Required

It is important that any person who finds a banded bird report the fact to the National Parks of Canada Branch, Department of the Interior, Ottawa, giving the species of the bird, band number, date and locality of occurrence, and information as to whether the bird was found dead, was killed, or was released alive still wearing its band. Persons reporting banded birds will be informed promptly respecting the place and time of banding.

Scotman: "How much to press a pair of trousers?"  
Agent: "One shilling."  
Scotman: "Then press one leg for six-pence—I am having my photograph taken side view."

She: "And don't you ever forget that I threw over a millionaire's son just to marry you."

He: "Yes that guy was not only born rich but lucky as well."

"Have you heard of the new medicine that's put in coffee and takes away all liking for whisky?"  
"Heaven! I'll never dare drink coffee again!"—Karlakuren, Oslo.

Novel Attempt To  
Escape From Prison

Robber Serving Sentence In Sing Sing Served Up In Mattress

A novel method of attempting escape from Sing Sing prison was uncovered when guards found Jack Levy within a mattress made in the prison factory. Levy, small and middle-aged robber, almost got away with it. He would now be on his way to freedom but for the curiosity of Victor Brown, keeper-chauffeur, who thought a pile of mattresses on his truck looked suspiciously lopsided although it had been twice inspected by other guards.

Brown summoned Principal Keeper Sheehy and a search was instituted. Sheehy ripped open one misshapen mattress and discovered Levy. Levy had a razor with which to cut his way out, and a hammer. The robber will be sent to Clinton Prison, Dannemore, N.Y. His attempted escape will put back his earliest possible date of release to 1932. Levy was sewed into the mattress from the outside. His accomplice has not been found.

## Tuning Out Noise

Idea Of Scientist, If Carried Out, Would Be Boon To World

A person is in an office that looks out on a busy street, and traffic is roaring past, mink, normal speech inaudible. He touches a switch and the noises fade away to nothing. The traffic is still streaming past, but one cannot hear a sound. That is the promise made by a well-known scientist, Dr. James Robinson. Dr. Robinson's idea is that sound waves might be "tuned out" in the same way as we get rid of unwanted broadcasting stations on our wireless set. Special apparatus built into the walls of a building will "trap" the sound waves and in this way we really shall get silence. Every day the mechanical world in which we live gets noisier and noisier.

(By Annabelle Worthington).

3360

The chic femininity and girlish prettiness of this yellow and green printed rayon crepe instantly appeal to the sophisticated miss of 8, 10, 12 and 14 years.

The flaring skirt shows soft gathering at front, and slight dipping at either side. A crushed girdle marks the normal waistline and ties in youthful bow at side.

The simple bodice is sleeveless. The capelet collar of plain yellow crepe is most unusual, opened at front displaying round neckline. An applied band of the printed crepe provides smart trim.

Style No. 3360 is very effective for parties made of pale blue georgette crepe with collar finished with picot edge.

Printed batiste, dimity, voile, tulle and printed lawn make up smartly.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

CHARMING YOUNG PRINCE

Photograph shows Crown Prince Michael, of Roumania, who was recently relieved of the cares of king when his father, Prince Carol, returned and took over the throne he renounced, with his faithful dog.

## Patrol Northern Highway

Mounted Policemen To Watch Traffic On Prince Albert National Park Road

Mounted Police in Saskatchewan assumed a new role when a member of the scarlet coated force heads northward from Prince Albert recently on a brand new motorcycle to inaugurate the system of patrols on the Prince Albert National Park Highway. Speedsters will have to watch their step in the future, for if they exceed thirty miles an hour the mountie may get them and then a fine up to the maximum of \$100 awaits the offenders on conviction.

Other regulations to be enforced require motorists to keep on the right of an imaginary line down the centre of the highway, to make sure his vision to the rear and not to each side is not obstructed and not to catch up and pass another vehicle at a blind curve.

Heavily loaded trucks with loads protruding beyond the sides of the vehicle will be required to pull well out to the side and stop if necessary to permit an approaching vehicle to pass. There are no set hours for the patrol, but it will be maintained throughout the day, and at times when traffic is particularly heavy. The mounted policeman and his motorcycle will be seen at night slipping along the highway to check up on reckless drivers.

## Recipes For This Week

(By Betty Barclay)

## PEANUT BRITTLED APPLES

Six large tart apples; one-fourth teaspoon salt; three-fourths pound peanut brittle; and four tablespoons lemon juice are required. Spread thinly sliced apples over the bottom of a baking dish. Sprinkle with salt, place a layer of peanut brittle on top, and repeat until all the apples and candy are used. Four lemon juice over top layer of apples before adding the last layer of brittle. Bake in a slow oven at 325 degrees for one hour.

## PINEAPPLE ORANGE SPONGE

1 package orange flavored gelatin.  
1 cup boiling water.  
1 cup pineapple juice and cold water.  
1 cup shredded pineapple, drained.  
Dissolve gelatin in boiling water. Add pineapple juice and cold water. Chill. When slightly thickened, beat with rotary egg beater until of consistency of whipped cream. Fold in pineapple. Turn into molds. Chill until firm. Unmold. Serves 8.

## Wit and Philosophy

Puns are not always properly attributed to their original author—possibly because puns have been condemned as the lowest form of wit. But some are worthy to live. Here is one which sums up whole systems of philosophy, "but it was originally aimed at George Berkeley's (1685-1753) various notions regarding matter and mind: "What is mind? No matter. What is matter? Never mind."—Christian Science Monitor.

## The Modern Maid

In answer to the advertisement of a Weymouth, England, boarding house keeper for a housemaid, one girl demanded a salary of \$225 a year, every Sunday and three evenings a week off, and a garage for her motorcycle.

## Ramsay MacDonald and Peace

Says Peace Is the Greatest Cause Before the World Today

Belief that peace is the greatest cause before the world today was expressed by Prime Minister MacDonald at the concluding sessions of the Inter-Parliamentary Union Conference in the gallery of the House of Lords.

"Until we come into personal contact, until we have looked each other in the eyes, until we have sat down side by side at a common meal, until we have discussed our national literature, science and arts, we will never be the type of citizen who understands others and has no suspicion in his heart about them," said the Prime Minister, pleading for effective international disarmament.

Mr. MacDonald expressed keenest pleasure at the action of the United States Senate in ratifying the London naval treaty, adding "If we are going to have disarmament, it can only be effected by international agreement, in carrying disarmament stage after stage until the job is finished, and very often, in the course of it, there will be disappointments."

## There's a Reason

John Big Soldier, 64-year-old Indian whose people at Black River Falls, Wisconsin, depend largely on the blueberry crop to bring them a living, may be able to explain better than your favorite restaurant proprietor why the latter is not serving so many blueberry pies. "Heap damn big frost," John said.

It's easy to tell if it's a friend or a bill collector at the door. Just wait a while and if it's a bill collector he won't go away.

SUNDAY SCHOOL LESSON  
AUGUST 3

NAOMI AND RUTH

Golden Text: "And He made of one very nation of men to dwell on all the face of the earth."—Acts 17, 26.

Lesson: The Book of Ruth. Devotional Reading: Isaiah 61-7.

## Explanations and Comments

The Beginning of the Story, 1:13.—In the days of the Judges there was a famine in the land of Canaan, and to escape it a Bethlehemite, Elimelech, and his wife Naomi, and their two sons, left their home and settled in Moab across the Jordan. The Jews have a legend to the effect that Elimelech was of a princely house, a descendant of Amminadab, the father-in-law of Aaron, that he was wealthy, and left the country in the time of famine in order to preserve his wealth intact, for he was afraid of being beleaguered by his starving brethren.

In Moab the two sons married daughters of that alien land, Ruth and Orpah. Ten years passed, father and sons found their graves there, and Naomi, now poor, whatever she had been in Bethlehem, determined to return to her native land. Farewells seldom take place in the home in eastern lands, and Ruth and Orpah carried out the usual custom when they accompanied Naomi, a short distance on her way. When Naomi thought they had gone far she turned to show her fitting respect, she stopped to dandle them. With tears and kisses she bade them return to their homes and let her go on her way alone.

Ruth's Great Decision, verses 14-18.—Though she grieved Orpah to part with her mother-in-law, she kissed her and returned as Naomi had promised. Ruth, however, clung to Naomi. With all her power Naomi sought to dissuade Ruth from accompanying her. "Behold," she said, "thy sister-in-law is gone back unto her people, and unto her god (Chemoah), return thou also after thy sister-in-law." In answer Ruth uttered those so famous words which have become so famous through the ages: "Entreat me not to leave thee, and to depart from thee after thee: for whither thou goest I will go; and where thou lodgest, I will lodge; thy people shall be my people, and thy God my God." The ancient belief was that each people had its own god, and that in going to another land one must necessarily serve the god of that land; compare 1 Samuel 26, 35.

Ruth was a Moabitess, of an accursed race, who according to the law of Moses was not allowed to enter the congregation of the covenant. While this story finally teaches that no such disability remains when faith in God is exercised, we must not forget the difficulty as it existed for Ruth. How could people who were likely to look at her, how she herself, as she came into contact with the religion of the Hebrew people, realize the greatness of her distance.

Again, there was nothing calculated to allure her from the standpoint of material property. Those she had known of the people of Jehovah had been compelled to leave their land on account of famine. From them she knew of the perils of those who had remained in the land, and all the sadness of their condition. She came back with Naomi into poverty, and to people who in all probability were more than both.—G. Campbell Morgan.

"Large is the life that flows for others' sakes; Expends its best, its noblest effort makes; Devotion rounds the man and makes him whole; Love is the measure of the human soul."—James Buckham.

Captain Sherlock Has  
Newest Air Record

Flew Mail Plane 1,500 Miles In One Day Making Five Stops

Record achievements in the air are just part of the day's work in the north country. The newest feat, unheralded almost among the brilliant exploits of the sub-Arctic fliers, is that of Captain W. N. Sherlock, Commercial Airways pilot. In less than a day he flew the mail from Fort McMurray, in northern Alberta, to Akivik, on the topmost rim of Canada—some 1,500 miles—making five delivery stops en route.

Son of Sir Francis and Lady Sherlock, Irton Hall, Cumberland, England, Captain Sherlock is a former member of the Royal Air Force. He has seen war and peace-time service in France, India, Egypt and Mesopotamia. Before joining the Commercial Airtel, he was a member of the flying staff of Dominion Explorers.

On the morning of June 26, at 5:45 o'clock, Captain Sherlock took off from Fort McMurray air base, flying a Bellanca Pacemaker. Less than 21 hours later, at 2:35 o'clock the next morning, with the midnight sun casting its twilight glow, he landed the mail at Akivik, within the Arctic circle. On his way, he made postal deliveries at Fort Resolution, Fort Simpson, Fort Norman, Fort McPherson and Arctic Red River along the rushing Mackenzie River.

Captain Sherlock's flight—just one of the records set up by fearless airmen speeding to and fro across the barrens of the northwest—was the first one-day flight from Alberta to Akivik.

## When Aviators Trespass

Judge Rules People Own Air Five Hundred Feet Up

Aviators must fly at least 500 feet high to avoid trespassing on property over which they pass, Federal Judge George P. Hahn, of Cleveland, Ohio, ruled in a precedent setting decision.

The decision was on a bill of complaint brought a year ago by two suburban property holders against the Curtiss Airport Corporation, the Ohio Air Terminals Company and the Curtiss Flying Service.

The complaint cited the ancient Roman legal principle, "Whosoever contrivs land controls it from the centre of the earth to the zenith," and sought an order forbidding "planes to pass over the property."

Judge Hahn ruled that the "effective possession" of such property extends only 500 feet up.

## On Arbitration Board

Appointment has been announced of the Rt. Hon. Mr. Justice Duff, of the Supreme Court of Canada, to act as Canadian representative on the arbitration board in connection with the "Tm Alone" proceedings. Mr. Justice Duff succeeds to the position made vacant by the death of the late Eugene Laferriere, K.C.

In acid soil, hydrangeas bear blue flowers, whereas in neutral soil they bear the "normal" pink blossoms.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

**WINDOLITE**

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.  
51 Wellington St. W. TORONTO, ONT.

## AIRWAY PLANS FROM HUDSON BAY TO BRITAIN

Vancouver, B.C.—Imperial Airways spanning the Northern Atlantic Ocean and Hudson Bay may some day link Canada with the other great routes of the British Empire, declared Major-General J. H. MacBrien, addressing the Canadian club here.

President of the Aviation League of Canada, he told how plans are now being laid for a trial flight across the northern route via Hudson Bay to Europe in 1931. Gasoline for this trip is now, through the courtesy of the Hudson Bay Company, being placed along the route.

At the same time, General MacBrien predicted that valuable as this connection may be in the imperial scheme of things, a great portion of the air traffic between the United States and Europe may have to traverse the same route.

Plans for the linking of the British Empire were first laid at the Imperial conferences of 1920 and 1928, he explained. As a result of these, the British-India route had been established and with it a feeder line running from Cairo across Africa.

On this feeder line, as he called it, the gold of South Africa is already being taken to Europe and put into circulation weeks before it would otherwise reach great centres of population. This meant the saving of much in interest.

The speaker also pictured the trial flight of the 1931, which will soon take off for this country, as forging another link in the aerial chain around the British Empire.

"Canada's geographical position," the general said, "is a most fortunate one—we can control these routes that pass over our country, and we must control them. We must have Canadian operated services."

## Second Reading Given Naval Treaty Bill

No Division In British House Of Commons

London, England.—The bill supporting the London naval treaty giving effect to the naval reduction compact signed recently passed its second reading in the House of Commons without a division.

Parliamentary Secretary G. G. Ammon explains that under the British legal system a treaty, although it might be binding and have effect on the British Government, could not be enforced in law courts against private individuals unless supporting legislation was passed.

Under the Washington treaty Britain entered into certain agreement not to build or provide by private shipbuilding certain vessels of war. The London treaty contained alterations of three agreements. To give effect to them, the Commons was asked to approve the bill.

## Compelled To Cancel Official Engagement

Weather Conditions Forced Prince To Abandon Airplane Trip

London, England.—For the first time on record the Prince of Wales was forced to cancel an official engagement because of weather conditions.

Weather reports from Wales indicated flying conditions were impossible and the Prince cancelled an airplane flight which he had intended making from London to Carnarvon to open the Royal Welsh Agricultural Show. As it was impossible to reach Carnarvon from London by train in time for the opening, the whole engagement was abandoned.

## Raps Border Patrol Bill

International Falls, Minn.—Denouncing the proposed border patrol bill before Congress as comparable to "barbed wire fences between Canada and the United States," Congressman William Pittenger, Duluth, was the principal speaker at the Border Press Association's annual meeting here.

## No Passengers Killed

Ottawa, Ont.—Railway accidents in Canada during May took a toll of 41 lives and resulted in injuries to 263 persons. It was shown in a report issued by the Board of Railway Commissioners. None of those killed were passengers on trains. Accidents at railway crossings resulted in 15 persons killed and 38 injured.

Peddlers of Cuba are offering cheap wares on the installment plan.

W. N. U. 1848

## Aviation Pioneer Dead

Glenn H. Curtiss Did Not Lose Faith When Others Became Discouraged

Buffalo, N.Y.—Glenn H. Curtiss, widely known aviation pioneer, died in the General Hospital here.

Mr. Curtiss was brought to the hospital from his home at Hammondsport, N.Y., to undergo an operation for appendicitis. The operation was said to have been successful and he was reported recovering rapidly.

Mrs. Curtiss came here with her husband and has been almost constantly at his bedside.

Hospital authorities stated death was due to pulmonary embolism, caused by a blood clot on one of the main arteries leading out of the heart.

Glenn H. Curtiss nurtured the young science of aviation in the middle years of its development, when fainter hearts had grown discouraged.

With a tomato can for a car-buretor, he built his first motor bicycle in 1902. He continued to experiment with lightweight motors and evolved his famous V-type motor, a departure in design reflected in the radial airplane engines of today. In 1904 he set a motor bicycle speed record at Ormond Beach, Fla., of 10 miles in eight minutes and 54 seconds, and in 1906, over the same course, travelled faster than man ever had before, a mile in 26 2-5 seconds.

His fame spread and drew the attention of the late Major Thomas Scott Baldwin, builder and operator of balloons. In 1904 the two men met in Hammondsport and installed a Curtiss motor in Baldwin's balloon. With this machine they made a circular flight of Oakland, Cal., in August, 1904, the first to fly that way.

Dr. Alexander Graham Bell, inventor of the telephone, commissioned Curtiss to build a motor for a man-carrying kite. Gliders were experimented with for a time, and the men turned their attention to power aeroplanes.

## Floods In England

Two Lives Lost In Consequence Of Cloudburst In Yorkshire

Whitby, Yorkshire, England.—Two lives are already known to have been lost, and other fatalities are feared, in consequence of a flood that followed upon a cloudburst in the valley of the Esk River.

The last connection with the village of Sleights, in the centre of the flood area, was severed late today when the telephone wires broke down.

Many families throughout the area are imprisoned in the upper part of the flood, which is expected to continue for some time.

The train service has been discontinued over a wide area.

Spectacular rescues were effected by the life saving crews, who did particularly effective work at Rusewarp. From one house a woman and four children, who had climbed to the roof, were hauled through the flood to safety by means of a breeches buoy brought into play by the coastguard.

From another house five people were rescued by the coastguards with life-saving apparatus at a time when the water had already reached the bedroom windows.

Twelve people were rescued from the upper storey of a mill.

The town clerk of Whitby patrolled the streets, and issued the notice that the water supply would last for only 48 hours. The pipes from the reservoir had been burst.

## Hoover Signs Naval Treaty

To Limit Fighting Vessels For Three Great Powers

Washington, D.C.—In the historic east room of the White House, President Hoover signed the London Naval Treaty.

Ratification by Great Britain and Japan and the depositing of all three signatures in London remain to be accomplished to bring into full effect the covenant limiting for the first time all categories of fighting vessels for the three great naval powers.

## No Reduction In Pay

Ottawa, Ont.—Department of railways and canals in a statement recently declared that men working on the Welland Canal were not reduced in pay as a result of the application of the eight-hour day and 44-hour week. All men, the statement said, will receive the same weekly wage as they did before parliament passed the legislation at the last session.

## Small Fire In Orphanage

Winnipeg.—The young inmates of St. Joseph's Orphanage here, marched out in orderly fashion and were unharmed when fire attacked the institution. Starting in a cupboard, the blaze quickly spread to the dormitory roof but quick arrival of firemen prevented extensive damage.

## Scores Drowned At Coblenz

Pontoon Bridge Collapsed Under Strain Of Heavy Traffic

Coblenz, Germany.—Scores of persons were drowned in the collapse of a pontoon bridge here during celebration of the evacuation of the Rhine-land in which President Von Hindenburg had taken part. About 100 people were on the bridge when it crumbled.

An enormous crowd had gathered along the banks of the Rhine during the evening at the so-called "Deutsches Eck," where the Moselle River joins the Rhine.

They stood watching the display of fireworks and the illumination of the ancient castle of Ehrenbreitstein in honor of President Von Hindenburg's visit.

When the display was over, thousands of people tramped across the pontoon bridge, which leads to a place known as "Security Harbor."

Suddenly, while about 100 persons were on the bridge, it collapsed under the strain of the unusual traffic.

Many were killed by falling timbers, and others were swept away in the black, swirling water and drowned before help could reach them.

In the darkness, which lately had been intermittently illuminated by the fireworks across the river, people could be heard splashing about and crying for help.

Rescuers immediately launched boats, but many of the victims could not be located.

## ADMINISTRATION OF PEACE RIVER BLOCK BY B. C.

Victoria, B.C.—British Columbia takes over the administration of the Peace River block and the railway belt on August 1, under tentative plans announced by the government. Efforts are being made now to adjust the necessary administrative details by that date.

The actual transfer will be accomplished without the disturbance of existing administrative machinery. For the time being, federal officials will carry on. As soon as possible, however, the administration will be entirely overhauled to eliminate the present duplication by federal and provincial officials, particularly in the railway belt, where two sets of machinery have operated side by side for years.

In some offices the provincial officials will be able to carry on alone, possibly with addition of one or two from federal territory. In the forestry department, however, it may be necessary for forest patrol in the large areas to be transferred.

## A Generous Gift

American Philanthropist Offers Ten Million Dollars For Educational Work In Britain

London, England.—The Daily Herald, government organ, says that Edward Harkness, of New York, American philanthropist, has offered £2,000,000 (about \$10,000,000), for the endowment of social and educational work in Great Britain.

The gift is to be administered by a board of public men. Invitations to serve on it have been sent, among others, to former Prime Minister Stanley Baldwin, Sir John Simon, the great financial expert, and to John Buchan, novelist and member of parliament.

## Presented To Rulers

London, England.—John McCormack, the Irish tenor, was presented to the King and Queen at a garden party in Buckingham Palace, July 23. Prof. Smiddy, high commissioner for the Irish Free State, introduced him.

## VISITOR FROM ANTIPODES

A. R. Harris, general manager of the Radio Broadcasting Co. of New Zealand, who spent the past two weeks studying conditions in Canada.

## Air Tragedy Told

Aviator Makes Heroic Attempt To Save Life Of Youthful Passenger

Edmonton, Alberta.—A story of terrific storm and of a heroic battle by Dale Atkinson, Western Canadian Airways pilot, in the freezing waters of Lake Nisku, Northern Saskatchewan, to save the life of his passenger, was told with the arrival of the body of the passenger, Woodrow "Chuck" Eagle, 17, of The Pas, Man., brought from the north by aeroplane.

Atkinson came out with the body in an aeroplane piloted by W. E. Gilbert.

Eagle died when Atkinson, running into a terrific windstorm which had attained the proportions of a typhoon, swung about, raced to Lake Nisku, landed and was pushing to shore. A cross gust of wind lifted one wing of the machine high in the air, toppled the aeroplane over on its back, and threw the occupants into the water.

Fighting his way down through the turbulent waters, which had been swept into fury by the storm, Atkinson smashed his way into the cabin of the machine, found that his passenger was not there and dived several times in an effort to find him.

Near exhaustion, Atkinson gave up the uneven battle and swam the dozen yards to shore.

The fatality occurred on July 15, and the pilot waited until the water gave up the body, July 19.

## Terrified By Masked Rider

People In Hills Of Wyoming Receive Threatening Letters

Wheatlands, Wyo.—Death threats signed "The Phantom Rider" received by several Fletcher Park ranchers has added to the uneasiness spread by the recent appearance of a masked horseman who rides the rugged Laramie peaks on a snow-white horse.

Five men and a woman are reported to have received the letter which were placed in the hands of officers seeking the "Phantom Rider" who recently rode into the yard of Charles Adams, 20, and shot the rancher through the shoulder.

Posses searched the hills following the attack but were unable to apprehend the mysterious horseman who is believed connected with recent cases of cattle rustling.

Children Faint At Service

Madrid, Spain.—More than 2,000 children fainted at a Communion Service here. They had risen early and fasted for the ceremony. When the hot sun came out girls and boys alike dropped unconscious. A staff of 80 nurses in attendance were inadequate to care for the sick. A total of 30,000 children were present.

## Leaders Meet

Rudyard Kipling and T. B. Macaulay, president of the Sun Life Assurance Company of Canada, leaders in literature and finance, aboard the Canadian Pacific liner "Duchess of Bedford" on their arrival in England.

## Beatty Issues Statement

Detailed Information On Air Service To Be Announced Later

Montreal.—In reference to the newspaper reports with respect to possible aviation developments in Canada, Mr. E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, made the following statement:

"By amendments to its charter secured in 1919, the Canadian Pacific Railway Company was empowered to establish and operate services of aircraft of all kinds, and in recent years it has, through its express department, entered into contracts for express services with established Canadian air service companies. Discussions have taken place between the president of the Canadian National Railways and this company, looking toward participation by both companies in the ownership of airway companies, both in eastern and western Canada, and these discussions have proceeded to the point where an agreement in principle has been reached.

"It is anticipated that each of the transcontinental railways will have an equal interest, and when negotiations have been concluded an announcement in greater detail will, no doubt, be made."

## Seeking New Trade Treaty With Canada

New Zealand Official Coming To Ottawa To Discuss Matter

Wellington, N.Z.—With the view of negotiating a new trade treaty between New Zealand and Canada, Dr. Craig, comptroller of customs, will sail on August 12 for Ottawa to open discussions with the Canadian authorities and carry matters as far as possible before the opening of the Imperial Conference, in London, England.

Dr. Craig will subsequently go to London to assist in the Imperial Conference discussions on tariff and allied economic questions.

## TRAIL OF DEATH FOLLOWS 'QUAKE IN SOUTH ITALY

Naples.—Amid the vine-clad hills of the Appennines the simple peasant folk of southern Italy had counted their loss to the October 7 of 579 in half a score of towns tumbled to ruins by a series of terrific earthquakes.

Government estimates placed the loss at more than a thousand, the homeless at ten times that figure. Melfi, picturesque mountain city, perched perilously upon the crater of the extinct Monte Vulture, was an area of ghastly debris. Even the ancient cathedral whose history in its several phases goes back to the ninth century, was wrecked.

The almost inaccessible nature of some of the areas devastated made difficult the work of succor and the estimation of casualties. Most of the towns hit the hardest are off the beaten paths of tourists, with poor transportation and almost inaccessible altitudes.

Several supply trains have been sent to points on the railroads in the interior from Naples, and hundreds of relief workers were pouring the resources of the agricultural area, offering relief to the still terror-stricken victims.

The 'quake stunned all Italy. It was the worst earthquake since Messina was all but obliterated in 1908. The first shock came an hour after midnight. Its own awful nature was supplemented by a tremendous electrical storm over virtually the whole affected area.

The shaken area extended from the Tyrrhenian sea to the Adriatic, but the coast settlements suffered less in proportion than the mountain populations. Naples experienced several hours of panic with several houses and scores of casualties. Among this city's victims was the Countess De Vargas. Never in all Neapolitan history has this class city experienced such stark-and-fright. A frenzied populace raced through the streets apparently heading nowhere.

Wrecked bridges, snapped communication wires and many other obstacles had been tossed in the path of the relief workers by the upheaval of nature. Motor cars made little progress over unaccustomed routes. The highways of the area are notoriously undeveloped and rail lines passed through many gorges into which the quake had tumbled avalanches.

Several tunnels upon the road to Melfi, where 180 persons perished, according to official figures, fell in and blocked service beyond restoration for many days.

## BRITAIN MUST ADOPT BETTER TRADE METHODS

London, England.—British methods of selling in Canada are severely criticized in the report of F. W. Fields, senior British trade commissioner in Canada, which has been made public by the department of overseas trade.

Mr. Fields attacks "long distance" selling methods, the under payment of agents and the failure of British manufacturers to adapt themselves to the changing conditions in the Canadian markets.

The criticism is endorsed by the Financial Times, which says: "The plain fact of the matter seems to be that the British have neglected to cultivate the Canadian market by the adoption of sensible methods of salesmanship and have allowed their American rivals to jump their claim. It is no longer possible to sell goods by correspondence, while it is often difficult to dispose of any large quantity of merchandise than they are on a commission basis."

"The Dominion has already done as much as can reasonably be expected to do in giving British goods a preference which is estimated to mean a transference from American to British imports of £40,000,000 in trade and naturally Canadians are now looking to Britain to show appreciation of this 'great help in Empire unity.'"

"The Dominion has already done as much as can reasonably be expected to do in giving British goods a preference which is estimated to mean a transference from American to British imports of £40,000,000 in trade and naturally Canadians are now looking to Britain to show appreciation of this 'great help in Empire unity.'"

## Manitoba Appointments

Officials Named To Take Over Duties In Natural Resources Department

Winnipeg, Man.—The Manitoba Government has filled seven important positions in its new Department of Natural Resources. They were made necessary through the taking over of the resources from the Dominion. All seven appointees were formerly employed by the Canadian Government.

They are: Col. H. J. Stevenson, provincial forester, heading the forestry branch; L. F. O. Noel, assistant director of provincial lands, John Tod, timber sales officer; W. B. McEllan, mining recorder, to be stationed at The Pas, Man.; A. J. McLaren, mining inspector and engineer, to officiate as inspector of mining claims; E. E. Patterson, engineer of water powers branch, to be stationed at Seven Sisters Falls; B. B. Hogarth, engineer of water powers branch, to be stationed at Slave Falls.

The augmented department will have a personnel of approximately 135 when the staffs are complete, it was stated. Appointments to the fisheries branch are not being considered.

The augmented department will have a personnel of approximately 135 when the staffs are complete, it was stated. Appointments to the fisheries branch are not being considered.

## U.S. Increases Population

Expect New Census To Show Population Of About 122,957,000

Washington, D.C.—A total of about 122,957,000 people—just a few thousand under 123,000,000—probably will be shown as the population of the United States for 1930, when the final count is announced here by Director W. M. Stewart, of the census.

The 1929 population was 105,710,620, showing that the population of the United States, the country would show a growth of around 17,246,000 people in the ten years.

This approximate total figure has been calculated by the Associated Press on the basis of actual preliminary returns from 40 states and the District of Columbia.

## Offered Life Membership

Services Of Political Leaders Is Recognized By Canadian Legion

Ottawa, Ont.—Dominion honorary life membership in the Canadian Legion is being offered the Rt. Hon. W. L. Mackenzie King and the Hon. R. B. Bennett, Sir William Clark, high commissioner for Great Britain, and the Hon. Jean Knight, until recently the minister of France in Canada, in recognition of their outstanding services in the interests of the returned soldier body and to the legion. The first occasion of Dominion honorary life membership being awarded since the inception of the legion is announced by Lt.-Col. L. R. Lafache, president of the Legion.

## Wonderful Display Of British Aircraft

Recent Meet At Hendon, England, Created Great Interest

Aircraft ascending through the atmosphere at 200 miles an hour, or crawling at the funeral pace of five miles an hour, monster ships and tiny ships, all kinds of aircraft, to the number of 200, were gathered at Hendon, England, at the great aerial display staged by the Royal Air Force.

The "gate" exceeded that of the Derby, England's greatest race, so great was the interest in this great exhibition of the modern marvels of the air. For probably at no time and in no place have so many aircraft been gathered together in one place.

It was a six-hour circus—the modern circus. The R-101 sailed its steady way across the sky. There were manoeuvres by large formations of "planes, mass parachute jump, flying upside-down, "crazy" flying and physical jerks by a squadron of nine planes. The squadron, linked by elastic cords, leaped simultaneously carrying streamers. A weird turn was supplied by an auto-gyro with its huge four-blade windmill climbing very slowly at 45 degrees. The gyro demonstration was followed by a mimic, the mimic being a "Gudburg" Handley-Page equipped with slots to imitate the gyro's every move.

## A Poor Business Head

But Famous Musician Got The Violin He Wanted

The world-famous violinist, Jan Kubelik, is fond of telling the story of how he acquired his first violin. I was—he says—quite a little chap at the time and was studying the instrument in a shop window in Prague. I begged my father to buy it for me. The shopkeeper wanted 500 kronen—roughly 12—which my father thought too much, as it was quite a common instrument. As my father turned away I followed in deep distress, beseeching him to reconsider his decision. "Well," said my father, "run back and offer him 300 kronen, and if he will not take that, offer him 400 and if he won't take that give him 500." I did exactly as I was bid. I told the man that my father said offer him 300 kronen, and if he wouldn't take that, offer 400; and if he wouldn't take that give him 500. "And," added Kubelik, "it wouldn't take a particularly clever person to guess what the man got."

## A Mountain Of Fire

Sawdust In Seattle Has Been Burning Twenty-One Years

A fire has been burning for the last 21 years in Seattle and there is small chance of ever putting it out. It originated in 1909 with the burning of the old pioneer Taylor sawmill. Sawdust, accumulated in years of millwork, has formed a mountain of waste and sparks will smolder in its bosom until there is nothing inflammable left. Several times a year the blaze gets so important firemen are kept busy for weeks trying to reduce its size.

## Saskatoon Exhibition

The Saskatoon Exhibition committee has prepared a prize list for finished beef animals open to Saskatchewan breeders only. They offer \$3,000 in prize money divided among five classes, and have arranged for the selling by auction of the competing animals on the morning of Saturday, July 26.

## To Form Live Stock Council

One hundred and eleven representatives of the Live Stock Breeders' Association, in the Province of British Columbia, contemplate the formation of a live stock council. Temporary officers were arranged for at a meeting in Vernon.

Iceland's summer climate runs a temperature averaging 50 to 55 degrees.

He: "It's funny, modern girls don't seem to want to marry."  
She: "Probably it's because it's you who ask them."—Fagge Gales, Yvond.

W. N. U. 1848

## Use Of Fertilizers

Field Treated With Superphosphates Shows Remarkable Progress

Although some may consider that the practically virgin soils of the west have no need of fertilizer, yet the experiment now being conducted on the farm of R. H. Chant, a few miles northeast of Foam Lake, Sask., is being watched with deep interest throughout the district and in wider spheres also. A field of 25 acres of Reward wheat was sown with superphosphates under the supervision of the Department of Agriculture. So far, this field has shown remarkable progress. It is from six to eight inches taller than untreated wheat and appears to be eight or ten days in advance, having been headed out for some time.

At present appearances, a yield of at least eight to ten bushels per acre over and above what will be from untreated fields may be looked for after the wheat gets such a good start that it keeps ahead of all weeds and thus helps in overcoming the weed menace. This fertilizer is also of great benefit in gardens where a small application will bring vegetables ahead.

## Contentment Is Best

People Who Envy Might Gladly Change Places With Us

A well known business man parked his new Packard car at the curb when a troop of children passed by. "Mister," they shouted in a spirit of banter, "give us your car." The man smiled indulgently. "I'd give you my car," he said, "if you'll take all my troubles and worries with it."

"Oh, keep your old car," they deprecated, and moved on.

They probably did not realize the significance of the reply, but we who are older understand. We often envy a man his good fortune, but if we knew of all his burdens we would not exchange places with him. We pine for the luxuries the rich enjoy and grumble at our own lot, forgetting that many a millionaire sighs for the simple pleasures of the days when he was in moderate circumstances.

We wish we could attend the banquets to which our more fortunate neighbors are invited, and we do not stop to realize how often they worry themselves to death to invent ostensible reasons for being absent.

You probably would not exchange with anybody if you knew all his position implies. Do not envy. Better far, thank the Lord for what you have, and be contented.—A. B. Rhinow.

## Occupations Far Apart

Inventions Of English Clergymen Useful In War

A clergyman who evidently did not consider that there was anything incongruous in serving the Prince of Peace, and at the same time inventing "gadgets" to help in the maiming and killing of his fellow-men, has just had a tablet unveiled to his memory at the Tower of London, England—quite an appropriate place. He was the Rev. Alexander John Forsyth, a Scotsman, who invented the percussion lock for small arms, and who also produced a detonating powder for which, it is said, he was offered £20,000 by Napoleon. Forsyth left his quiet manse to work in the Tower, and when his duties over he returned to his village with an honorary LL.D. degree. The reverend inventor died in 1843. This is the first time a memorial to a private individual has been erected in the precincts of the Tower.

## Vast Area Of Canada

On a given day last summer, O. S. Finnie, administrator of the North West Territories, was at Lkavik, N.W.T.; Dick Finnie, son of O. S., was with the Canadian Expedition at Ellesmere Island, N.W.T.; Miss Dorothy, the daughter, was at Kingston, Ont., and Mrs. Finnie was at Vancouver. All were in Canada and no two were closer together than 2,500 miles. Few have any idea of the vast area of Canada.

## Bandages Of Silver

Bandages, made of silver, instead of cotton, apparently have the power of healing surgical wounds, according to Dr. F. Paritzsch, of Vienna University, Austria. The silver, applied in the form of a thin leaf, he reports, seems to have a marked antiseptic value.

## Heavy Gold Production

Canada May Advance To Second Place Among World's Gold Producers

Prospects are that Canada will this year advance into second place among the gold producing countries of the world. North America holds first place and the United States second. Last year the value of gold produced in Canada was approximately \$40,000,000. This year it is expected the value will be about \$50,000,000.

Almost without exception, the larger mines in Northern Ontario, the principal source of gold production in the Dominion, are expanding their output. Besides the straight gold producers there are several copper mines that add an important quota of gold as a by-product.

Within the next year it is likely that Manitoba will play an important role in gold production. The bulk of the expanded Canadian production this year will come from the Kirkland Lake and Porcupine districts in Northern Ontario, which, for several years, have been large producers of gold and other minerals.

## Leads The World

Britain leads the world in aeronautical manufacturing, it was stated in the Air Ministry's report of the progress of civil aviation. The report showed that more than \$10,000,000 worth of aeronautical material was exported last year. All-round progress in both private and commercial aviation was recorded. Britain now has 21 light aeroplane clubs with a membership of 3,648.

## Honor Land Surveyors

First land surveyors of the west were honored recently when a memorial cairn and tablet was unveiled near Headingley, Man., where the principal meridian crosses the highway to Portage la Prairie, R.C. McPhillips, veteran surveyor, unveiled the cairn.

## EDUCATION ON WHEELS

Under the personal direction of A. McCowan, Assistant General Superintendent of Car Equipment, the Canadian National Railways completed, this week, at the Port House Shops (Winnipeg), the above car for the use of the Ontario Board of Education.

The purpose of this car is to educate people at points where school facilities are not available. Advantage will be taken of this educational equipment by both children and older persons desiring to use the educational advantages thus brought right to them. Provisions are made to educate the youngest child commencing to count on the bead frame, up to older children in the regular subjects taught in the best schools, even including typewriting.

The car is also designed to make a permanent home for the teachers. Entering from the living portion of the car is seen a large Baker heater which is designed to keep the car comfortably warm in the coldest weather; on the opposite side of the car is a large refrigerator 36 in. x 8 ft., which will take care of the food requirements for a considerable period. Next will be seen the kitchen with a neat range with hot water connections, standard metal sink and work table covered with the same metal, under this work table are the usual cupboards, four bins and cutting board. Two large copper tanks are the means of storing a good supply of water. Over the work table are china cupboards fitted with nests and racks to keep china ware safe when travelling.

Adjoining the kitchen is a small living room with removable table, a couch which can be converted to a lower and upper sleeping berth and

## Agricultural Wealth

Gross Agricultural Wealth Of Canada Estimated At Nearly Eight Billion Dollars

The gross agricultural wealth of Canada for 1928 is estimated at approximately \$7,378,633,000 in a summary published at the National Revenue Department.

Last year's total revenue from agriculture was \$1,067,216,000, of which Ontario accounted for \$300,434,000; Quebec, \$320,422,000; Sas- \$229,580,000; Manitoba, \$134,006,000; British Columbia, \$55,385,000; Nova Scotia, \$48,558,000; New Brunswick, \$38,984,000; and Prince Edward Island, \$28,723,000.

The two principal items which go to make up the total of agricultural revenue are field crops, valued at \$679,710,000, and dairy products, with an estimated value of \$390,000,000. Farm animals are third with a value of \$210,437,000, and poultry and eggs fourth with a value of \$100,346,000.

## Noise Is Serious Peril

Investigators Find Health Of New York Residents Affected

A state of emergency exists in the city of New York as a result of the tremendous increase in noise during the last few years, according to the first report of the noise abatement commission headed by Edward Fisher Brown.

The report stresses that the noise must be reduced at once or the health and efficiency of the city will suffer.

A sub-committee of physicians found definite proof that noise produces undue pressure on the brain, affects metabolism, produces partial or total deafness, prevents concentration, retards learning, and interferes with normal development of infants and young children.

Divorce by letter or telegram is now possible in Mexico at a cost of about \$2,000. These divorces are granted for "mental cruelty" and are valid in the United States and France.

## Plays Chess In The Open

Minnesota Entertained Best Huge Board Chess In Garden

Perhaps chess is the last game one associates with fresh air and exercise. Yet there is one chess enthusiast who has succeeded in playing his favorite game under ideal conditions in the open. He is Mr. E. P. Goodlet, a wealthy citizen of Tupelo, Missouri.

On discovering that his liking for the ancient game kept him too much indoors, he hit upon the ingenious idea of an outdoor chessboard that would enable the players to get some physical exercise in the health-giving sunshine while concentrating deeply on what to do with their kings, queens, bishops, castles, and pawns.

Mr. Goodlet decided to have his chessboard at the rear of his home. The dark square of the board were made of the lawn itself and the light squares were made of pieces of marble set in concrete. Strips of concrete formed the border of the playing area.

While the masons and gardeners were busy planning the board, skilled cabinetmakers, using a small ivory set of "Henry VII." chessmen as models, were put to work on a set of giant wooden chessmen, which were to be accurate enlargements of the normal-sized models. Wood of light weight was used for these men, so that the players could lift them easily in the course of a game.

When the oversized set was finished it was painted in waterproof enamel, half the set in ivory and the other half in dark red. So cleverly had the cabinetmakers done their work that the big men were in perfect proportion to the enlarged playing area and were fashioned with all the interesting detail found in the small set of men. The comparative thinness of the upper parts of the men and their round heads made them at once stable and easy to move from square to square.

On summer evenings an electric lantern is suspended over this unique board, thereby making play possible even in the dark when it is possible to learn, this giant chessboard is the largest in the world.

## A Bushel Of Wheat

Farmer's Hard Work Means Nothing Without Co-Operation Of Nature

What part does the hard-working farmer play in growing a bushel of Number One Northern wheat? Important as he and the officials of farm co-operatives may think it, the part of more man in the making of a wheat crop may sometimes be overestimated.

At Ottawa they have recently found that in the making of a bushel of wheat, thirty-one tons of water are required. In Western Canada this water is supplied almost wholly from natural sources without use of pumps or other equipment for artificial irrigation. It comes in clouds carried by the winds and descends in the form of rain or snow or dew.

The sun on high plays his part in making the wheat, warming the seed bed, giving the heat to make the young seeds germinate, sprout and mature. Old Man Frost plays his part, also.

To make the good black dirt of Western Canada in which the wheat may grow, a combination of great natural forces has wrought for a million years.

Man may plant, may cultivate, may reap a plot of wheat, but after all man in all his glory, with all his tools of production and his labor, cannot create a single grain of wheat that will grow. The toiling farmers can help produce a bushel of wheat, can contribute to the production of more and better wheat, but they claim too much when they accept full credit for making the wheat harvest. Nor can man control the price of wheat after it is grown.

## Happiness In Work

Idler's Hours Are Empty Of Joy Said Roosevelt

I pity no man because he has to work. If he is worth his salt he will work. I envy the man who has a work worth doing and does it well. The man who is not frequently happy; the idler's hours are empty of joy. Man must work and struggle in order to grow. If he allows his faculties to become dull, and his powers to lie dormant he withers and dies.—Theodore Roosevelt.

## Rose Culture In Canada

"Rose growing, as a business, is rapidly developing throughout Canada into a trade of considerable magnitude," according to an illustrated booklet issued from the Ontario Department of Agriculture. "Although the great majority of growers are found in Ontario, nurserymen and florists are cultivating roses in every province of the Dominion."

## Manitoba Has Ancient History

British History In Western Province Commenced 318 Years Ago

"We have been told," said Dr. D. A. Stewart, president of the Manitoba Historical and Scientific Society to Rotarians at a luncheon, "that Manitoba has no history. This is not correct."

"We have a long, interesting, romantic and useful history. This jubilee we are celebrating will send our roots farth down in our history than ever before. The farther the roots the bigger and better the plant."

Manitoba is not confined to sixty years of history, the speaker said, but has more than five times sixty years of history.

"Indeed, I might say," he continued, "nine and one-half times sixty years of white man history, for we have some reason to believe Scandinavians came along the Red River 130 years before Columbus. But real British definite white man history in Manitoba began just three centuries and 18 years ago."

"In that 518 years of history there have been five distinct periods, the provincial periods being the latest. The first came when Manitoba was found more or less by accident in the search for a northwest passage. It was seen by Henry Hudson, and two years later by Thomas Hudson, who landed on Manitoba soil near the mouth of the Nelson River and remained there during the winter of 1612."

After Button came, he said, several other expeditions pushed their way into Manitoba, paving the way for the second period of the history of 1670-1783, the period of building posts and organized trade.

"The third section of our history," Dr. Stewart continued, "was that of trade rivalry. There are two gates from the east to Manitoba, the Hudson Bay gate, exclusively used from 1612 to 1783. Then the St. Lawrence-Great Lakes-Winnipeg River gate was opened. There was rivalry between these two gateways from 1783 to 1821. About 1870 the Hudson Bay gate was closed and all routes led from the east. Now in 1930 the Hudson's Bay gate is again opened."

The fourth period was the colonial period of the province's history, he said, and began in strife, but toward its end became prosperous and happy—almost idyllic. The fifth period also began in strife, but contained the boom which made Manitoba a known land almost overnight.

"Today, in what might be considered as the future period of Manitoba history, from 1930 to 1960, we have come to live, down to the very great in- plagues of today. There are the incurable pessimist, the unbalanced optimist, the sectionalist, the slacker and the waster."—Manitoba Free Press.

## Have To Be Cleaned

Sculptured Flames On London Monument Need Attention Regularly

Men have recently been busy on the top of the London Monument (known as "The Monument"), where they have been cleaning the sculptured flames. Although most Londoners are familiar with the Monument, probably few could explain why it was erected, and when, and many would look puzzled if allusion were made to the flames. The Monument was designed by Christopher Wren, and was built in 1671-77, at a cost of £14,000, in Pudding Lane, Essex Chapel, where the Great Fire broke out in 1666. It is 202 feet high. Every six months the flames are washed, and next year they will be regilded. For this work the best 24-carat gold leaf is employed.

## To Supervise Buildings

Efforts to control within certain limits, the architectural style of buildings erected in Winnipeg, have been started by the civic zoning committee who have instructed the city solicitor to prepare legislation giving the city authority to control architectural and other details of all buildings other than residences.

"Why did you steal a bicycle from the cemetery?"  
"I thought the owner was dead."—Hummel, Hamburg.

## WRIGLEY'S

Life-like good golf-is made up of many little things each one of which helps the score.

Better digestion-steadier nerves-clearer brain, are all factors that count and are gained from the use of Wrigley's.

### CHAPTER XXII—Continued

Long after she had read the letter a second time and put it safely away in prospect of a third perusal, in case of it kept coming back to her, such as: "You ask why I should be inarticulate with you, of all people? I've sometimes wondered about that myself. Ask Grandma. Perhaps out of the wisdom of years she can explain that foolish self-consciousness on my part. . . . And lower down: 'Of course I wasn't mad—not even hurt, just a little sore, maybe. . . . I knew that deep down inside you didn't think me a Shylock anyhow—you just didn't understand. . . . So it was the dear old doctor who gave me away!'"

"And near the end: 'How's your boarder? According to Lizzie Baker he's about to settle down with a lady of my acquaintance 'for better, for worse,' etc.; only in this case it would be a great deal better than he, or any other man deserves. If this happens to be idle gossip, Charman, please pass the good word along. Yours always, John.'"

"Well," said John Carter, raising the girl from her reverie, "was it satisfactory?"

"You mean?" questioned Charman as they started back to the house.

"I refer to the letter. I was good enough to bring you," he replied.

"She laughed happily."

"More than satisfactory. It took a load off my contrite mind. You see, John, I said something mean and hateful to Jim Bennett before he went away. I didn't intend to be unjust, but I was, terribly. Now it's all over."

"That sounds most as if Jim was talking, doesn't it?" she commented when the letter was finished. "Read again what he says about his mother. She and Sophie always did look as alike as two peas; but that's where the resemblance ends. George K. used to say that Sophie (who was born half an hour ahead of Sarah), took all the unselfishness there was, and didn't leave any for her twin! George was always a little hard on Sarah because he felt she ruined James Bennett's life. What it is Jim said about them, dearie?"

Charman found the place and read: "I feel as if I had two mothers all of a sudden. It's a weird sensation, coming into a room and not being sure whether you're confronting your mother or your aunt? Joking aside, the resemblance is really startling; till you get used to it. And how they love each other! Seeing them together has made me wish I had a twin—some one who'd understand me the way Mother and Aunt Sophie seem to understand each other. As for this ranch business—"

"He didn't say, did he?" broke in Grandma, "whether he's going to run the farm for 'em? Seems if those two women were pretty old to start any such thing. Sarah Bennett married late in life. She can't be a day under fifty-six, nor Sophie either."

"Well, naturally," laughed Charman, "considering that they're twins!" No, Jim didn't mention that part of it."

"Nor say what they'd do with the Wickfield house," went on Grandma, exasperated at this oversight. "Men are terribly unsatisfactory about details. I remember a parish meeting thirty-odd years ago when there was an awful fight. I was sick with a cold and couldn't go; and you will believe it, when your grandfather came home all he said was that 'there seemed to be a little unpleasantness!' He never so much as mentioned how Edgar Furdie shook his fist in the face of the parish clerk (it was, Emma Beaumont's father, and was a little man as ever lived), and went off slamming the door behind him; or

straightened out and . . ."

"God's in His heaven!" quoted the doctor as she hesitated.

"You're a marvelously understanding soul," she answered. "That's exactly the way I feel, only I didn't think to express myself through Browning."

He smiled, drew up under a lonely tree and stopped the car.

"Foolish!" asked Charman, thinking of the engine.

"I hope not!" he replied. "Then his face, grew serious and he turned to her. 'Charman,' he began, 'now that you've digested that letter—got your mind cleared on the subject, in a way, I've something to tell you. Wait till this automobile passes, and

But the approaching automobile didn't pass. It stopped, and Emma Beaumont's familiar face peered at them from behind the windshield.

"Hi, Doc!" he greeted. "One of Lizzie Moore's twins is 'took down with spirit white.' Doctor here wants you should hurry right along to the deacon's. He's waitin' for you there."

"Thanks," shouted John Carter as Emma, who was evidently in haste, sped on. Then he turned again to the girl beside him, and added ruefully: "Like tide and time, appendicitis waits for no man. It's our confidential conversation that must wait. Do you mind if I drop you at the church? I ought to hurry."

### CHAPTER XXII

Where's the doctor?" questioned Grandma, who was surprised to see the girl arrive on foot.

Charman explained, while the old lady uttered an ejaculation.

"Dear me! Appendicitis—and the deacon and Luella have just had words! Lizzie Baker told me the whole story. Maybe this trouble will bring on your leg, 'Char. There's nothing in it so not to drive 'em farther apart, seeing as their isn't what you'd call a love match. Well, dearie, you got your letter, didn't you? Did Jimmy tell you what his mother's up and down?"

Charman laughed, tossed the old coat on a chair and kissed her grandmother.

He told me everything. I was silly to get worked up. Grandma, of course Jim wasn't angry. He wrote as soon as he got my letter. Here!"

Charman drew the lengthy epistle from her pocket and tossed it into Grandma's lap. "There's nothing in it that you can't see. It's a darling letter."

"You read it out loud, dearie," Grandma smiled noting with thankfulness that the girl hadn't been sunny self again. "There's no hurry about supper with the doctor off hunting an appendix. I told you all along that Jim wasn't the boy to bear a grudge. You sit with your feet over the register, Charman, and get warmed up while you read to me."

Charman was only too glad to obey, and her grandmother was an attentive audience.

"That sounds most as if Jim was talking, doesn't it?" she commented when the letter was finished. "Read again what he says about his mother. She and Sophie always did look as alike as two peas; but that's where the resemblance ends. George K. used to say that Sophie (who was born half an hour ahead of Sarah), took all the unselfishness there was, and didn't leave any for her twin! George was always a little hard on Sarah because he felt she ruined James Bennett's life. What it is Jim said about them, dearie?"

Charman found the place and read: "I feel as if I had two mothers all of a sudden. It's a weird sensation, coming into a room and not being sure whether you're confronting your mother or your aunt? Joking aside, the resemblance is really startling; till you get used to it. And how they love each other! Seeing them together has made me wish I had a twin—some one who'd understand me the way Mother and Aunt Sophie seem to understand each other. As for this ranch business—"

"He didn't say, did he?" broke in Grandma, "whether he's going to run the farm for 'em? Seems if those two women were pretty old to start any such thing. Sarah Bennett married late in life. She can't be a day under fifty-six, nor Sophie either."

"Well, naturally," laughed Charman, "considering that they're twins!" No, Jim didn't mention that part of it."

"Nor say what they'd do with the Wickfield house," went on Grandma, exasperated at this oversight. "Men are terribly unsatisfactory about details. I remember a parish meeting thirty-odd years ago when there was an awful fight. I was sick with a cold and couldn't go; and you will believe it, when your grandfather came home all he said was that 'there seemed to be a little unpleasantness!' He never so much as mentioned how Edgar Furdie shook his fist in the face of the parish clerk (it was, Emma Beaumont's father, and was a little man as ever lived), and went off slamming the door behind him; or

## 1 Minute Each Itch of ECZEMA

how Mrs. Garfield got so excited she had hysterics right in the vestry and had to be carried out. I never heard a word about it till next day when Lizzie Baker run over to borrow a yeast cake. I wonder, chicky, if Jim is coming back to Wickfield."

"And leave his mother running a fruit ranch?" gasped Charman. "If Jim ever does a thing like that, Grandma, I'll look for the end of the world. It's a wonder Mrs. Bennett let him go to San Francisco that week without her. Oh, dear! how can a woman with a nice son like Jim be such a tyrant?"

"I've been thinking that maybe she's written to you about the land, and give Sarah a good talking to," replied Grandma. "Sarah'll take from her what she wouldn't take from anybody else, even James Bennett, and in her own way she loved him, too. Mrs. Merry was in a minute after she told, Charman. She said to tell you they'd had a long letter from Madge, and that the baby'd got another tooth. It does seem strange to think of Madge having a baby after all. It makes you seem like a well . . ."

"An old maid?" suggested Charman, rising. "You may as well get used to the idea, Grandma. An old maid schoolmarm who—"

"Shucks!" interrupted Grandma with indignation. "I guess you don't need to be an old maid unless you want to! What are you going to tell Jimmy about that idle gossip he'd heard talk of?"

Charman laughed, but she flushed also, and answered: "I think I'll forget that question, Grandma. It's none of his business."

"I guess he thinks 'tis," responded Grandma wisely; then with a sudden change of subject: "I wish you'd make milk toast for supper, dearie. Seems as if I'd sort of relish it to-night. And be sure you leave some cocoa on the stove in the double boiler. The doctor'll be home late, and most frozen, night like this. Look here, Charman," she added as the girl turned toward the kitchen, "I didn't understand what Jim meant by saying he'd appoint you, his deputy in the matter of Tower and Mouser."

"That was merely a bit of sentiment," smiled Charman. "I'll explain about it later; but now I must hurry away or my mother will be here."

Grandma? It's almost dark."

"No, chicky. I like to sit here this time of day and see the lights come on in the kitchen windows, and watch folks hurrying home to supper. Sometimes I can't make out who they are, but I always know they're glad the day's work is done and they're going home. Many's the time I've sat here in the twilight with your grandfather and watched the shadows of the evening steal across the sky," as the vesper hymn says. I'm never loathsome this time of day as some folks are. I guess it makes me feel the way you felt one night when we were just a mile of a thing and I was putting you to bed. Your mother'd been in the habit of leaving a light turned low in the hall outside your door—sort of to keep you company; but that night she was at a church supper and after you said your prayers I sat down on your little bed and repeated the twenty-third psalm."

"I can see you now, looking up at me so soberly and listening to every word like a group-guy. Well, I kissed you, and gave the bedclothes a last tuck, and said: 'Good-night, chicky. I'll leave the light, name as Mother does,' and what do you suppose you answered? You said, just as solemn as anything, 'No, Grandma. The Lord

is my shepherd, I shall not want—a light.'"

"Oh, Grandma!" cried the girl, as she visioned the little Charman of long ago. "You never told me that before!"

"Didn't I? Well, I've thought of it enough times, goodness knows. It came into my head the minute you asked if I'd like a lamp. You see, dearie, I'm not afraid of the twilight even though it's a time of memories. The Lord is my shepherd. I shall not want—a light."

(To Be Continued.)

### Mystery Of Name Origins

Romance and History Lie Behind Modern Surnames

There's a lot of romance and history in the name-plates on our neighbors' doors. Many of them open windows on a vanishing world.

Most people are too busy to think about the names which they have used all their lives. Yet nearly every name in use today has a very long history and a very picturesque origin.

Take the name of Mr. Baldwin, the Conservative leader, for example. It is very old, and comes from two Teutonic words: bald, meaning "bold," and win, meaning "friend."

Hence, "Bold Friend."

Surnames, properly speaking, were not common in England, even in the fourteenth century. But most men had nicknames. Many of these names stuck, passed on from son to son, and are current today. Thus, Goodfellow, Hogg, Logman, Little, Dark, and so on.

A quaint instance of such a surname is "Nottingham." The Nottingham Borough Record. It is "Over-and-over." Perhaps the first Over-and-over was long-winded!

Surnames proper came in when the population increased to such an extent that they were necessary to avoid confusion. Trades, crafts, locations, and eccentricities very often determined them.

The queer surnames sometimes given to foundlings can be ascribed to this source—a childish baffle, speaking the first name that comes to his empty head, or a Mr. Bumble, giving an alphabetical system and giving "gumdrops" to suit the follies of each little victim. It was in this way that Oliver Twist received his immortal name.

### Ice Hockey In August

Entertainment For Delegates To British Medical Association Convention

Summertime in Winnipeg will be transformed into frigid winter to provide atmosphere for the hundreds of distinguished "medical men" who will gather there from all parts of the Empire for the British Medical Association convention. Ice will be laid in the amphitheatre rink for the week August 24-30 in order that the Winnipeg Skating Club and two picked teams of local star material, may give fancy skating and hockey exhibitions for the visitors.

The Oil Of The People—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position as the most useful of all. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and used no other preparation.

### A Clever Idea

Ingenuous swindles seem to be without number. A new fountain pen swindle was exposed in London. Pens priced about \$2, but worth 30 cents, were mailed to persons whose obituaries had just been printed in the newspapers. In most cases the executors of the estates thought the dead penmen had ordered the pens and paid without comment.

### Would Help Farmers

The Agricultural Council points out that the cup of sorrow given to every German regular army man each morning has to be imported and suggests instead that the army drink milk for breakfast, thus increasing farm income.

The man who won a big pool in a horse race had his name in the papers. The papers aren't big enough to publish the names of all the losers.

Turkey expects bounteous crops this year.

## WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. F. Stewart, Findlater, Sask., writes: "Twenty years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Millers Co., Ltd., Toronto, Ont.

### Canadian Goods In British Daily Life

Always Something To Remind People Of Dominion's Products

"What the future holds for Canadian products in the United Kingdom, can be judged in the light of today," said Douglas S. Cole, B.Sc., Canadian Trade Commissioner, at Bristol, England, in an interview at Toronto. "The modern Englishman can rise in the morning from a Canadian-made bed on to a Canadian carpet, latter himself with a Canadian shaving brush and Canadian shaving cream, shave with a Canadian razor, come down to breakfast and eat Canadian cereals, Canadian bacon, Canadian eggs, and toast made from Canadian flour, all cooked on a Canadian gas or electric range, and kept wholesome in a Canadian refrigerator, the whole he reads a newspaper printed on Canadian paper. He can drive in a Canadian car to an office equipped with Canadian furniture, dictate letters on Canadian paper, which he seals with a Canadian fountain pen. He reduces his weight by a Canadian massage roller, plays racquets in Canadian rubber shoes, tries to look graceful on Canadian skates, and drives his doctor to starvation with Canadian apples."

Dust Causes Asthma. Even a little speck too small to see will lead to agonies which no words can describe. The walls of the breathing tubes contract and it seems as if the very life must be forfeited. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

### Machine Matches Colors

Newest Invention Will Be More Exact Than Skilled Matchmaker

In France, wine-tasters sip wines, let their tongues tell them whether the fluid is better for a plebeian carafe or a gentleman's cellar. Were it not for whiskey-tasters England's famed blenders would be unable to produce a uniformly good product year in, and year out. On equally skilled men depend the fact that all vermillion dyes are uniform, that azure satins are azure. But follies of the color-matcher's eyes, which tire quickly, make them expensive to their employers.

A new machine, on the market, will doubtless throw scores of color matchers out of work. It will perform their function with more exactness, with less waste, and, biggest advantage of all, it will not depend on daylight for its accuracy. The heart of the machine, invented by New York University's able young physicist, Dr. Harold Horton Sheldon, is a light source reflected from two samples a photoelectric cell.

Of the same color placed in the machine, passes into the cell, gives an electrical impulse which is indicated by a galvanometer. The indicator hand is then set at zero, the unknown sample is introduced. If the hand again points to zero the match is perfect. It varies to the right the sample is too dark, to the left, too light. A variation of three-calibrated scale divisions is considered a passable match.

### Obedient Instructions

The teacher impressed on his pupils the need of thinking before speaking, told them to count fifty before saying anything important, and one hundred if it was very important.

Next day he was speaking, standing with his back to the fire, when he noticed several lips moving rapidly.

"Run up quickly to room 456, and just see if my umbrella is there. I think it is to the left of the washstand, but hurry up!"

A minute later the boy returned and panted: "Yes, sir, the umbrella's still there, at the left of the washstand."

### Perfectly Safe

When the guest was just leaving his hotel to hurry to the station, he noticed that he had forgotten something. He said to the page-boy: "Run up quickly to room 456, and just see if my umbrella is there. I think it is to the left of the washstand, but hurry up!"

A minute later the boy returned and panted: "Yes, sir, the umbrella's still there, at the left of the washstand."

### Minard's Liniment removes Warts, relieves Bunions.

For all Skin Abrasions—Minard's Liniment.

A remarkable feature of the 1929 forest fire situation in Manitoba and Saskatchewan was that fires occurred and were fought in every month of the calendar year.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath of constipation, invoke the gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castor Oil is ever drugstore the genuine always bears Chas. H. Fletcher's signature.

### CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. ## Little Helps For This Week

"Master, what shall I do to inherit eternal life?"—Luke x. 25.

I do not ask that Thou wilt bless With gifts of heavenly note my day. So much as that my hands may dress The borders of my lowly way. With constant deeds of good and right, Thence reflecting heavenly light.

—Alice Cary.

Good deeds will shine as the stars in heaven.—Thomas Chalmers.

Good deeds are very fruitful; out of one good action of ours the Lord produces a thousand, the harvest whereof is perpetual.—Bishop Hall.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of an injurious nature in its composition. It will speedily rid the child of worms and restore the health of the little sufferers whose vitality has become impaired by the attacks of these internal pests.

### Signatures On The Roof

Copper Plates On Stockholm Town Hall Bear Name Of Donor

Ragnar Ostberg, who has just been made a Royal Academician, is probably the most famous architect in Europe. His fame rests largely on the wonderful town hall which he designed for his native Stockholm, and which has been inspected by visitors from all over the world. It cost nearly a million pounds to build and it was decorated by a remarkable team of artists, which included a prince of the Royal House. The roof is composed of copper plates, each one of which is inscribed with the name of the citizen who paid for it, and the floor of one of the magnificent halls was made by the workmen, on their own initiative, out of odd pieces of marble left over from other building operations.

### Utilities Show Profit

The City of Regina utilities showed a new surplus, according to the statement of S. B. Nelles, city comptroller, of \$18,474 for the first five months 1930, after deducting administration charges of \$7,083, while the Electric Light and Power Department showed a surplus revenue of \$139,507, the Water Department, a profit of \$11,391, and the Street Railway, a deficit of \$12,140.

## MAIL CONTRACT

SEALED TENDERS, addressed to the  
Postmaster General, will be received at  
Ottawa until noon, on Friday, the 22nd  
August, 1930, for the conveyance of His  
Majesty's Mail, on a proposed Contract  
for a period not exceeding four years 24  
times per week on the route Crossfield  
and C. P. Railway station, from the 1st  
October, 1930.

Printed notices containing further in-  
formation as to conditions of proposed  
Contract may be seen and blank forms  
of tender may be obtained at the Post  
Office of Crossfield, Alberta, and at the  
District Superintendent of Postal Office,  
8rd. July, 1930

J. B. COBLEY,  
District Superintendent  
of Postal Service  
Calgary

## Local and General

Mrs. J. Annon and Mr. J. Taylor  
of Wayne, spent the week-end visit-  
ing Mr. and Mrs. Cruickshank.

Rev. H. Young and family left  
town on Tuesday last holiday bent,  
seeing the country by motor.

Mr. and Mrs. A. W. Gordon and  
family motored to Calgary on last  
Wednesday.

BORN—To Mr. and Mrs. Glen  
Jones, at Calgary, on Friday, July  
25th, a son.

Mrs. D. J. McKay of Calgary,  
was renewing old acquaintances  
in town last week and was the  
guest of Mrs. W. McRory.

The Rev. Attwood of Ogden,  
will hold service in the Church of  
Ascension at 11 o'clock next Sun-  
day morning.

The Women's Guild will hold  
their weekly sewing circle at the  
home of Mrs. Mossop on Thurs-  
day August 14th, at 3.30.

Mayor and Mrs. J. M. Wil-  
lams, Grace and Jackie, are leav-  
ing today (Thursday) on a two  
weeks auto trip to Saskatchewan

Mrs. P. Griffiths and children,  
returned on Saturday, after spend-  
ing a two weeks holiday with relative  
near Ponoka.

Mr. and Mrs. C. Marston and  
Mrs. M. Turner of Calgary were  
visitors in town on Tuesday even-  
ing.

Mrs. Earl Devins and daughter  
Audrey are spending the week-  
end in Blackie, at the home of  
Mr. and Mrs. Leslie High.

Miss Florence Cruickshank re-  
turned on Sunday from Wayne,  
where she had been visiting her  
grandmother.

Fred Stevens has been doing a  
lot of electioneering the past two  
weeks, on Tuesday he was wearing  
a million dollar smile, one that  
would not wash off.

The Women's Guild will hold  
their regular monthly meeting at  
the home of Mrs. Green on Thurs-  
day, August 7. Will all members  
please attend at 3.30.

A. (Happy) McMillan is back on  
the job again after enjoying a  
holiday at Waterton Lakes, Banff  
and finally finished up with a  
fishing trip out west of Olds.

Third prize in the baseball ben-  
efit draw awaits the holder of ticket  
No. 58. Anyone having this num-  
ber should get in touch with Glen  
Williams, secretary of the Baseball  
Club.

The Misses Marjorie Metheral, Eva  
Jarman, Frances Mobbs and Kath-  
leen Mair, returned on Friday after  
spending ten days at the C. G. I. T.  
camp at Sylvan Lake.

A. H. Miller, local manager of  
the Canadian Bank of Commerce,  
returned on Sunday from California,  
where he had been on a three weeks  
vacation. Mrs. Miller and Lexy  
will remain in California for some  
time.

Mr. and Mrs. R. T. Amery and  
children, of Walla Walla, Wash.  
arrived here last week. It is more  
than likely that Mr. and Mrs.  
Amery will take up their residence  
again in Alberta.

Mr. and Mrs. Harry Blott and  
family of Estuary, Sask., visited  
at the home of Mr. and Mrs. Guy  
Wickerson on Sunday, enroute  
home after holidaying at Banff  
and Lake Louise.

Services will be held next Sun-  
day at Beaverdam at 11 a.m.;  
Inverlea at 8.30 p.m. There will  
not be any service in Crossfield  
United Church in the evening.

The Chronicle has printed the  
bills for the 24th annual picnic and  
sports to be held at the Dog Pound  
on Wed., Aug. 6. Athletic events,  
horses races, baseball, horseshoe  
tournament, Indian races, archery  
contest, pow wow and a dance.

Mr. and Mrs. J. A. McCool and  
daughter of Edmonton, spent the  
week-end in town visiting rela-  
tives. Mr. McCool throws a keen  
horseshoe and on Saturday even-  
ing showed some of our pitchers  
how the game is played.

## Local and General

The baseball dance and drawing  
for prizes, held in the U.F.A. hall  
on Wednesday night, was well at-  
tended and a good time was had.  
A list of prize winners and donors  
of special prizes will appear in  
next week's issue.

Mrs. L. Halliday of Clearlake,  
Wis. and Mrs. F. Halliday of Ells-  
worth, Wis., have been visiting  
their sister Mrs. Winchell of Bot-  
trel, and Mrs. W. Thome of Samp-  
son, for the past month and are  
leaving next week for home.

Mr. and Mrs. H. Whitfield and  
Mr. and Mrs. C. Marston were vis-  
itors here on Saturday last, to see  
their aunt Mrs. Adler who is sick,  
but, who we are glad to report is  
progressing favorably under the  
attention of Dr. Whillans and Mrs.  
P. I. McAnally.

The United Church Sunday  
School and families, plan to hold  
their annual picnic on August  
13th, at St. Georges Island. Will  
parents kindly co-operate with  
children in letting their Sunday  
School teachers know how many  
can go.

Parties returning from Peace  
River are not enthusiastic about  
prospects there. Wages are very  
low with many applications for  
the jobs available. Homesteaders  
find breaking up brush farms to be  
a sizeable undertaking, especially  
when the price of grain is consider-  
ed. Just at present it is a good  
place to keep away from unless you  
have money.

The Women's Guild were not  
satisfied with weather conditions on  
last Saturday, when they were to  
have a tea on the lawn at the home  
of Mrs. Thomas, but, the ladies  
were equal to the occasion and served  
refreshments in the Haven's Gar-  
age building. The Rev. Currie,  
his wife and daughter, motored up  
from Calgary to be present and be-  
come acquainted with some of their  
new parishioners.

The cushion presented by Mrs.  
Earl Devins was won by Mrs. Miles  
Fike.

Altogether a very pleasant after-  
noon was spent. The tea proved  
a financial success, netting the Guild  
\$33.00.

The ladies of the Guild, wish to  
thank all those who helped make  
such a successful afternoon.

## Horseshoe Tournament

Aldred Bros. were successful in  
retaining the McCool Challenge  
Trophy, on Saturday night, when  
they defeated the challengers, W.  
E. Bennett and W. H. Miller, two  
games out of three. The final game  
finished up with a score of 20 to  
21, and gives you an idea of the  
play; in fact if looked as if it was  
all over but the shouting, when  
Bennett made a ringer and was  
touching the peg with his second  
shoe, but, Jim Aldred showed his  
class, by putting another ringer on  
top of it, which left Bennett and  
Miller only a single point, and the  
score standing at 20-20, on the next  
end Bill Aldred scored a point on a  
shoe that was touching the peg. It  
was a great finish and a good game  
to win.

Several challenges are in for the  
trophy and it will be played for on  
Saturday night at 7.30 sharp. The  
usual weekly tournament will also  
be held on Saturday night.

All members are urged to turn  
out this week-end, as a meeting  
will held following the tournament.

## Correction

Barney said he made an error  
last week re Cruickshank. A  
stand for Adam, not Andy, but  
Barney thought Adam looked too  
much like a swear word, and he  
was afraid Jim Williams might  
take deception to it; still I had  
better get the error regulated.

## MARCELLING

Eather Devins has resumed busi-  
ness next door to the phone office.  
Make appointments either there  
or at the post office.

Lost—Auto license plate No.  
79-557. Will finder please leave  
at Chronicle office.

Now the elections are over, per-  
haps everybody can settle down to  
work again.

## Board of Trade Notes

The Crossfield and District  
Board of Trade is to be congrat-  
ulated with the opening of the  
Village Park. Many citizens of  
the district never knew that Cross-  
field had such a park until the day  
of the picnic.

Any person who has the inter-  
ests of the Crossfield District at  
heart, should become a member  
of the Board of Trade. There  
are 114 members at the present  
time, but, the Executive of the  
Board would like to see more  
members on their lists.

The Crossfield and District  
Board of Trade is proving itself  
worthy of support from the citi-  
zens of the community.

Crossfield and district is being  
well advertised these days through  
the press. Even London, Eng-  
land has heard of Crossfield dur-  
ing the past few weeks in connec-  
tion with the C. P. R. line going  
west from here, so that Crossfield  
is very much before the public  
just now. Let everybody in the  
district try and help to keep the  
good name of Crossfield steering  
that way.

## BASEBALL

DRUMHELLER, July 28.—  
Crossfield baseball team had an  
even break in a double header  
against Chicago Athletics played in  
Drumheller on Sunday. The  
snappy Crossfield aggregation took  
the first game 7 to 2, while the  
colored boys turned in a 7-4 for  
the final. Rasback, who was on  
the mound for Crossfield in the  
first game, pitched well, fanned  
seven and kept his hits scattered  
W. Robertson of touring team,  
hit a home run off Rosback in the  
first inning.

Scotty Lee was given poor sup-  
port in his attack on the colored  
team otherwise he would have  
held runs down. He turned in  
eight strike outs as compared with  
Wilson's three.

With the score tied in the fifth,  
Webb sent the ball sailing over  
the fence with two on. L. Rob-  
ertson made a spectacular catch  
in the ninth when he caught a ball  
off the fence at left field from  
D'Arcy McKinnley's bat.

The Teams  
Crossfield—Bills rf, McPadyen  
ss, McKinnley c, Williams 3b, Nel-  
son rf, Schmidt cf, McDowell 2b,  
Holland lf, Robertson 1r, Rasback  
p, Lee p.

Athletics—W. Robertson 2b, L.  
Robertson lf, Webb 3b, Brooks c,  
Slaughter cf, Childs ss, Wagner  
rf, Saunders p, Wilson p.

The Chicago Athletics won both  
games from Crossfield at the local  
diamond on Wednesday. The first  
game was won by the colored team  
by a score of 14 to 3. The even-  
ing game was a real contest and  
won by the Athletics by a score  
of 3 to 0.

## EXTRA

An all star American Associa-  
tion League team will play the  
Great American all star colored  
team at Diamond Park, Cross-  
field, Thursday, August 7th at  
6.30 sharp. Don't fail to see the  
Big League teams in action.
